Value Investing – It’s in Our DNA

BENJAMIN GRAHAM
 LA JOLLA, CALIFORNIA 92037

March 1, 1974

Dear Mr. Brandes:

This is the day to wish all good future and success to Branco Investors Ltd.. Naturally I am complimented by your statement that the new firm will be operated along "Graham principles." Actually I believe that this is an excellent time to launch an enterprise of this sort and I'm confident that your partners will be well-pleased with the results.

I'm sorry ~~to~~ to say that my health is on the poor side these days and I can't be sure that I'll make my engagement for April 3rd. But I'm hoping for the best.

Sincerely,
Ben Graham

Brandes Investment Partners, L.P.
 4275 Executive Square, 5th Floor
 La Jolla, CA 92037

Dear colleagues:

50 years ago, Benjamin Graham sent me a letter wishing me success in launching an investment business that I indicated would be based on "Graham principles."

Today, celebrating 50 years in business is a significant milestone, and I am honored to share this moment with you and the firm. The steadfast commitment to principles that prioritize the wealth and well-being of clients is commendable.

As we reflect on the past five decades, let's continue to build on the firm's successes, ensuring the same benefits for clients in the next 50 years.

Graham hoped our firm would meet with "good future accomplishments". I close by wishing you and everyone at the firm the same heartfelt sentiment.

Warm regards,
Charles (Herk) Brandes

50 Years of Fundamental Value: Lessons Learned

Active Value Investing Has Evolved but Key Principles Are Enduring

- **Markets/styles tend to be cyclical**
 - Value vs. growth
 - U.S. vs. international markets
- **Themes go in and out of favor – focus on margin of safety**
 - Nifty Fifty
 - Japan's dominance in 1980s
 - Tech bubble
 - *What is next?*
- **Time in the market is essential**
 - Compounding is a powerful force but requires patience
- **Independence and structure matter**
 - Both in terms of managing portfolios and the firm

The margin of safety for any security is defined as the discount of its market price to what the firm believes is the intrinsic value of that security.

Value with Brandes

50 Years of Fundamental Value: Brandes' Evolution

Active Value Investing Has Evolved but Key Principles Are Enduring

Establishment of Investment Committees

- Diversity of thought and experiences contribute to optimal decision making
- Allows peer review or devil's advocate of the analysts' work

Organization of a Global Research Group

- Global sector teams provides breadth of coverage with depth from a very experienced analyst team

Evolution of Portfolio Construction

- Not all margins of safety are created equal
- Consider potential range of outcomes for fair value estimates; review nuances in company valuations

Increased Awareness to Reflect on Lessons Learned

- Staying proactive by evaluating portfolios from a different perspective
- Utilizing 3rd party materials to evaluate portfolios and past decisions

Long Focus on Corporate Governance and Stewardship Integration

- Have always mattered in estimating the fair value of a business; not a "tick the box" exercise

Value Consistency

Morningstar Holdings-Based Style Quarterly Time Series

JUNE 30, 2019 TO JUNE 30, 2024 | Source: Morningstar Direct. Data icons reflect aggregate portfolio holdings at a specific quarter-end point with the more recent the holding period, the larger the icon. Value Started with Bonds

“Fixed Value Investments”

Entire Part 2:

- Dedicated to fundamental analysis of corporate bonds
 - 16 chapters
 - 162 pages

Brandes VALUE Fixed Income Philosophy

Based on Graham & Dodd Value

- Fixed-income markets frequently misprice bonds
- Fundamental analysis identifies VALUE
- Purchase at a significant discount
- Add positions when market is weak
- Typically hold for 2–5 years
- Maintain concentrated portfolio

Not All Bond Strategies Are the Same

Transparency – Critical to Know What You Own

Popular Bond Strategies

- Top down, macro-focused
- Thousands of securities
- High frequency trading
- Derivatives and/or leverage

Brandes VALUE Fixed Income

- ✓ Graham & Dodd, bottom-up
- ✓ Concentrated and transparent
- ✓ Long-term, not trading
- ✓ CASH pay bonds
 - No derivatives/exotics/leverage

Although the firm's investment guidelines permit the use of derivatives (including futures, options, swaps, and structured products) in its fixed income investment strategies, the fixed income investment committee seeks to avoid these types of securities except in extraordinary situations.

Fundamental Company Analysis

Examining 2 Sides of a Company: Credit/Equity

The Power of Income

Nearly All of Long-Term Fixed Income Returns Have Been Attributable to Income

DECEMBER 31, 1976 TO DECEMBER 31, 2023 | Source: Bloomberg Indices. Returns shown are monthly Bloomberg U.S. Aggregate Bond Index returns from December 31, 1976, to December 31, 2022. The US Aggregate Index was created in 1986 with index history backfilled to 1976. Past performance is not a guarantee of future results. ¹ Total return includes interest, capital gains, dividends and distributions realized over a given period of time. Once cannot invest directly in an index. ² Price return is the rate of return on an investment portfolio, where the return measure takes into account only the capital appreciation of the portfolio.

Higher Risk—Not Always Higher Return

CUMULATIVE TOTAL RETURN BY RATING USING ANNUAL RETURNS, DECEMBER 31, 1984 TO DECEMBER 31, 2023 | Source: Bloomberg U.S. Corporate High Yield Bond Index as of 12/31/23. The U.S. Corporate High Yield Bond Index was created in 1986 with index history backfilled to January 1, 1983. Data prior to 1986 is the result of back-testing performed by the index provider. There are frequently material differences between back-tested and actual performance. Past performance is not a guarantee of future results. It is not possible to invest directly in an index. The performance shown represents the total return of index constituents with the individual ratings shown. Ratings issued by Moody's Investors Service, Standard & Poor's or Fitch Ratings.

Corporate Investment Grade Bond Yields Have Surged

Driven by Increasing Treasury Yields Rather Than Credit Spreads

JUNE 30, 2014 TO JUNE 30, 2024 | Source: Bloomberg Indices. The Bloomberg U.S. Credit Index measures the investment grade, US dollar-denominated, fixed-rate, taxable corporate and government-related bond markets. It is composed of the US Corporate Index and a non-corporate component that includes non-US agencies, sovereigns, supranationals and local authorities. The U.S. Credit Index Option Adjusted Spread is the difference between the yield of the US Credit Index and the yield on U.S. Treasuries.

Are Investors Taking on More Risk for Less Compensation?

Spread Levels Are Still Much Narrower than Levels Seen During the Global Financial Crisis

OPTION ADJUSTED SPREAD RANGES (25 YEARS ENDING JUNE 30, 2024) | Source: Bloomberg Indices. Past performance is not a guarantee of future results. It is not possible to invest directly in an index. U.S. Aggregate represented by the Bloomberg U.S. Aggregate Bond Index; U.S. Agency represented by the Bloomberg U.S. Agency Bond Index; U.S. Mortgage Backed Securities represented by the Bloomberg U.S. Mortgage Backed Securities Index; Asset-Backed Securities represented by the Bloomberg U.S. Fixed-Rate Asset Backed Securities Index; U.S. Credit represented by the Bloomberg U.S. Credit Bond Index; U.S. Corporate High Yield represented by the Bloomberg U.S. Corporate High-Yield Bond Index; Global Credit represented by the Bloomberg Global Credit Index. Option-adjusted spread: A measurement of the spread of a fixed-income security rate and the risk-free rate of return, which is adjusted to take into account an embedded option. Basis point (bps): 1/100 of 1%.

Overall Inflation Has Declined, but 'Supercore' Inflation Remains Stubbornly High

Supercore Inflation is CPI Core Services Less Housing

MAY 31, 2018 TO MAY 31, 2024 | Source: Bloomberg. The Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by consumers for a basket of goods. The CPI core services measure excludes energy services. Supercore inflation is defined as CPI core services less housing.

Is Housing Inflation Understated in CPI?

JULY 31, 2016 TO APRIL 30, 2024 | Source: Bloomberg. Consumer Price Index (CPI); S&P CoreLogic Case-Shiller 20-City Composite Home Price NSA Index: Seeks to measure the value of residential real estate in 20 major U.S. metropolitan areas; U.S. CPI Owners' Equivalent Rent: Measures the change in the shelter cost consumers receive from their primary residences.

Are We Certain the Current Federal Funds Rate Is Restrictive?

Bloomberg Financial Conditions Index Shows 'Easier' Financial Conditions Than Before First Rate Hike

JUNE 25, 2021 TO JUNE 28, 2024 | Source: Bloomberg. The Bloomberg U.S. Financial Conditions Index tracks the overall level of financial stress in the U.S. money, bond, and equity markets to help assess the availability and cost of credit. A positive value indicates accommodative financial conditions, while a negative value indicates tighter financial conditions relative to pre-crisis norms. The Federal Funds Rate is a target interest rate set by the central bank in its efforts to influence short-term interest rates as part of its monetary policy strategy.

Mission Accomplished?

Twice During the 1970s, the Federal Reserve Cut Interest Rates Only to See Inflation Accelerate Again

DECEMBER 31, 1967 TO DECEMBER 31, 1981 | Source: Bloomberg. The Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. The Federal Funds Rate refers to the target interest rate range set by the Federal Open Market Committee (FOMC). This target is the rate at which commercial banks borrow and lend their excess reserves to each other overnight.

Agency MBS Market Has Been Supported by Massive Federal Reserve Purchase Activity

The Fed's Increased Involvement in the Agency MBS Market Has Contributed to a Considerable Supply/Demand Imbalance

Federal Debt as a Percentage of GDP Near All Time High

Timeless Value Principles – Thoughtful Evolution

50 Years of Fundamental Value

Disclosures

Dividend Yield: Dividends per share divided by price per share.

Enterprise Value: Market capitalization plus net debt.

EV/Sales: Enterprise value divided by sales.

EV/EBITDA: Enterprise value divided by earnings before interest, taxes, depreciation and amortization.

Forward Price/Earnings: Price per share divided by expenditures.

Nifty Fifty: A popular name in the 1960s and 70s for a group of the largest U.S. companies.

Price/Book: Price per share divided by book value per share.

Price/Cash Flow: Price per share divided by cash flow per share.

Price/Earnings: Price per share divided by earnings per share.

Yield: Annual income from the investment (dividend, interest, etc.) divided by the current market price of the investment.

The Bloomberg Global Aggregate Index is a flagship measure of global investment grade debt including treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers.

The Bloomberg Global Credit Index is a comprehensive benchmark that measures the performance of global investment-grade fixed-rate debt markets. It encompasses various indices, including the U.S. Aggregate, Pan-European Aggregate, Asian-Pacific Aggregate, and Global Treasury indices, among others.

The Bloomberg U.S. Fixed-Rate Asset Backed Securities (ABS) Index: The Bloomberg U.S. Fixed-Rate Asset Backed Securities (ABS) Index is an unmanaged index consisting of U.S. dollar-denominated, fixed-rate, taxable bonds. The U.S. Fixed-Rate Asset-Backed Securities (ABS) Index covers fixed-rate ABS with the following collateral types: credit cards, autos, home equity loans and stranded-cost utility (rate reduction bonds). To be included in the index, an issue must have a fixed-rate coupon structure, have an average life greater than or equal to one year, and be part of a public offering. Manufactured housing asset-backed securities were removed from the U.S. ABS Index on January 1, 2008. The index was introduced in January 1992 when it was also added to the U.S. Aggregate Bond Index in its entirety. The index is a total return index which reflects the price changes and interest of each bond in the index.

The Bloomberg U.S. Agency Index includes callable and non-callable agency securities that are publicly issued by U.S. government agencies, quasi-federal corporations, and corporate or foreign debt guaranteed by the U.S. government (such as USAID securities).

The Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market. This index is a total return index which reflects the price changes and interest of each bond in the index.

The Bloomberg U.S. Corporate High-Yield Bond Index is an unmanaged index consisting of U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bonds. The U.S. Corporate High-Yield Index measures the market of U.S. dollar-denominated, non-investment grade, fixed-rate, taxable corporate bonds. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below. The index excludes emerging-market debt. It was created in 1986, with history backfilled to July 1, 1983. The U.S. Corporate High-Yield Index is part of the U.S. Universal and Global High-Yield Indices. The index is a total-return index which reflects the price changes and interest of each bond in the index.

The Bloomberg U.S. Credit Index measures the U.S. dollar-denominated, fixed-rate taxable corporate and government related bond markets. The index is a total return index which reflects the price changes and interest of each bond in the index.

The Bloomberg U.S. Mortgage Backed Securities Index tracks mortgage backed pass-through securities of Ginnie Mae (GNMA), Fannie Mae (FNMA), and Freddie Mac (FHLMC). The index is a total return index which reflects the price changes and interest of each bond in the index.

The Bloomberg U.S. Treasury Index measures U.S. dollar-denominated, fixed-rate debt issued by the U.S. Treasury. The index is a total return index which reflects the price changes and interest of each bond in the index.

The Dow Jones Industrial Average is an unmanaged, price-weighted index of 30 blue-chip U.S. stocks.

The MSCI ACWI with net dividends captures large and mid cap representation of developed and emerging markets.

The MSCI ACWI Growth Index with gross dividends captures large and mid cap securities across developed and emerging markets. Attributes for growth index construction are long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, long-term historical sales per share growth trend.

The MSCI ACWI Value Index captures large and mid cap securities across developed and emerging markets exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price and dividend yield.

The MSCI ACWI ex USA Small Cap Index with gross dividends captures small-cap representation across developed and emerging markets excluding the United States.

The MSCI ACWI ex USA Small Cap Value Index with net dividends measures small-cap equity market performance of developed and emerging markets excluding the United States. The attributes for value index construction are book value-to-price ratio, 12-months forward earnings-to-price ratio, and dividend yield.

The MSCI ACWI ex USA Small Cap Growth Index with net dividends measures small-cap equity market performance of developed and emerging markets excluding the United States. The attributes for growth index construction are long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

The MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) Countries.

The MSCI EAFE Index with net dividends captures large and mid cap representation of developed market countries excluding the U.S. and Canada.

The MSCI EAFE Growth Index with gross dividends captures large and mid cap securities across developed market countries, excluding the United States and Canada, exhibiting growth style characteristics, defined using long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

The MSCI EAFE Value Index with net dividends captures large and mid cap securities across developed market countries, excluding the United States and Canada, exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield.

The MSCI Emerging Markets Index with gross dividends captures large and mid cap representation of emerging market countries.

The MSCI Emerging Markets Index with net dividends captures large and mid cap representation of emerging market countries. Data prior to 2001 is gross dividend and linked to the net dividend returns.

The MSCI Emerging Markets Growth Index with gross dividends captures large and mid cap securities exhibiting growth style characteristics, defined using long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

The MSCI Emerging Markets Value Index with gross dividends captures large and mid cap securities exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield.

The MSCI USA Index measure the performance of the large and mid cap segments of the U.S. equity market.

The MSCI USA Value Index measure the performance of the large and mid cap segments of the U.S. equity market exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield.

The MSCI USA Growth Index measure the performance of the large and mid cap segments of the U.S. equity market exhibiting growth style characteristics, defined using long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

The MSCI World Index with net dividends captures large and mid cap representation of developed markets.

The MSCI World Value Index captures large and mid cap securities across developed market countries exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield.

The MSCI World Growth Index captures large and mid cap securities across developed market countries exhibiting growth style characteristics, defined using long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

The MSCI World Momentum Index is designed to reflect the performance of an equity momentum strategy. It does so by emphasizing stocks with high price momentum, while maintaining reasonably high trading liquidity, investment capacity, and moderate index turnover. The index is based on the MSCI World, which includes large and mid-cap stocks across 23 Developed Markets (DM) countries.

The MSCI World Value Index captures large and mid cap securities across developed market countries exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield.

The MSCI World Growth Index captures large and mid cap securities across developed market countries exhibiting growth style characteristics, defined using long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

The MSCI World Quality Index is based on MSCI World, its parent index, which includes large and mid cap stocks across 23 Developed Market countries. The index aims to capture the performance of quality growth stocks by identifying stocks with high quality scores based on three main fundamental variables: high return on equity (ROE), stable year-over-year earnings growth and low financial leverage.

The Nikkei 225 Index measures performance of the 225 domestic common stocks in the Tokyo Stock Exchange First Section.

The Russell 1000 Index with gross dividends measures performance of the large cap segment of the U.S. equity universe.

The Russell 1000 Growth Index with gross dividends measures performance of the large cap growth segment of the U.S. equity universe. Securities are categorized as growth or value based on their relative book-to-price ratios, historical sales growth, and expected earnings growth.

The Russell 1000 Value Index with gross dividends measures performance of the large cap segment of the U.S. equity universe. Securities are categorized as growth or value based on their relative book-to-price ratios, historical sales growth, and expected earnings growth.

The Russell 2000 Index with gross dividends measures the performance of the small cap segment of the U.S. equity universe.

The Russell 2000 Value Index with gross dividends measures performance of the small cap segment of the U.S. equity universe. Securities are categorized as growth or value based on their relative book-to-price ratios, historical sales growth, and expected earnings growth.

The Russell 2000 Growth Index with gross dividends measures performance of the small-cap segment of the U.S. equity universe. It includes those Russell 2000 companies with higher price-to-book ratios and higher forecasted growth values.

The S&P Developed Ex U.S. SmallCap Index with gross dividends measures the equity performance of small cap companies in developed markets excluding the United States.

The S&P Developed Ex U.S. SmallCap Index with net dividends measures the equity performance of small cap companies in developed markets excluding the United States. Data prior to 2001 is gross dividend and linked to the net dividend returns.

The S&P 500 Index measures equity performance of 500 of the top companies in leading industries of the U.S. economy.

Annualized Performance %	1 Year	5 Years	10 Years
Emerging Markets Equity Composite (gross)	25.50	5.94	3.32
Emerging Markets Equity Composite (net)	24.72	5.30	2.61
Benchmark (a)	9.83	3.68	2.66

(1) The measure of dispersion is the asset-weighted standard deviation for annual period gross returns in USD of all portfolios in the composite for the full reporting period. Beginning in 2017, dispersion is not presented for periods with less than 2 accounts in the composite. Prior to 2017, dispersion is not presented for periods with less than 6 accounts in the composite.

(2) The three-year annualized ex-post standard deviation measures the variability of the monthly gross composite returns and the benchmark returns over the preceding 36-month period.

* The net and gross annual returns, calculated in USD, presented for the Brandes Emerging Markets Equity Composite were calculated on a time-weighted and asset-weighted, total return basis, including reinvestment of all dividends, interest and income, realized and unrealized gains or losses and are net of brokerage commissions, execution costs, and any applicable foreign withholding taxes, without provision for federal and state income taxes, if any. Returns for some accounts in the composite reflect the deduction of a broker fee that includes transaction costs and may include advisory, custody, and other administrative fees.

Beginning January 1, 2018, Brandes Investment Partners includes Brandes Investment Partners, L.P., Brandes Investment Partners (Europe) Limited, Brandes Investment Partners (Asia) Pte Ltd. and the Brandes Investment Partners & Co. assets sub-advised by Brandes Investment Partners, L.P. For the period from 1/1/06-12/31/17 the SMA Division of Brandes was excluded from the GIPS firm definition. The firm was redefined to reflect the dissolution of the SMA Division and the firm bringing those former SMA Division assets into compliance with the GIPS Standards.

This composite was created in 1995. The inception date is 12/31/1994.

Prior to April 2014 accounts were removed from the composite when an account's market value falls below US\$50,000 due to capital withdrawals.

The Brandes Emerging Markets Equity Composite seeks to achieve long-term capital appreciation by investing primarily in equity securities of emerging and frontier country issuers in those emerging market and frontier countries in which the firm believes the economies are developing strongly and the markets are becoming more sophisticated, regardless of market capitalization. The firm intends to invest the composite primarily in issuers located in emerging market countries within some or all of Asia, Europe, Central and South America, Africa, and the Middle East. Emerging markets securities pose greater liquidity risks and other risks than securities of companies located in developed countries and traded in more established markets.

From 2013 through 2019 composite performance after management fee returns were determined by reducing the gross of fee returns monthly by the highest applicable fee schedule per account. As of October 2019, actual fees are used with the exception of select portfolios to which the applicable fee schedule was applied for the entire year to better reflect our typical management fees. For periods where actual fees were used to calculate the net return, a model fee representing the standard fee schedule is applied to any non-fee paying accounts included in the composite.

Standard fee schedule - First \$25 million 0.90%; Next \$25 million 0.80%; Next \$50 million 0.75%; Next \$50 million 0.70%; Amounts over \$150 million 0.60%. Brandes' investment advisory fees are detailed in Part 2A of its Form ADV.

Brandes claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brandes has been independently verified for the annual periods 1995 through 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Emerging Markets Equity Composite has had a performance examination for the periods since inception through year end 2022. The verification and performance examination reports are available upon request.

A list of composite and limited distribution pooled fund descriptions, a list of broad distribution pooled funds, and policies for valuing investments, calculating performance, and preparing GIPS Reports, are available upon request. Contact client service at 800-237-7119 or write P.O. Box 919048, San Diego, California 92191-9048 or email ClientService@Brandes.com.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Investors should not rely on prior performance results as a reliable indication of future results.

(a) The MSCI Emerging Markets Index with net dividends captures large and mid cap representation of emerging market countries. Data prior to 2001 is gross dividend and linked to the net dividend returns. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. The benchmark returns are not covered by the report of independent verifiers.

Global Equity Composite (gross)	22.42	11.86	7.27
Global Equity Composite (net)	21.84	11.27	6.69
Benchmark (a)	23.79	12.80	8.60

(1) The measure of dispersion is the asset-weighted standard deviation for annual period gross returns in USD of all portfolios in the composite for the full reporting period. Beginning in 2017, dispersion is not presented for periods with less than 2 accounts in the composite. Prior to 2017, dispersion is not presented for periods with less than 6 accounts in the composite.

(2) The three-year annualized ex-post standard deviation measures the variability of the monthly gross composite returns and the benchmark returns over the preceding 36-month period.

* The net and gross annual returns, calculated in USD, presented for the Brandes Global Equity Composite were calculated on a time-weighted and asset-weighted, total return basis, including reinvestment of all dividends, interest and income, realized and unrealized gains or losses and are net of brokerage commissions, execution costs, and any applicable foreign withholding taxes, without provision for federal and state income taxes, if any. Returns for some accounts in the composite reflect the deduction of a broker fee that includes transaction costs and may include advisory, custody, and other administrative fees.

Beginning January 1, 2018, Brandes Investment Partners includes Brandes Investment Partners, L.P., Brandes Investment Partners (Europe) Limited, Brandes Investment Partners (Asia) Pte Ltd. and the Brandes Investment Partners & Co. assets sub-advised by Brandes Investment Partners, L.P. For the period from 1/1/06-12/31/17 the SMA Division of Brandes was excluded from the GIPS firm definition. The firm was redefined to reflect the dissolution of the SMA Division and the firm bringing those former SMA Division assets into compliance with the GIPS Standards.

This composite was created in 1978. The inception date is 12/31/1977.

Prior to April 2014 accounts were removed from the composite when an account's market value falls below US\$50,000 due to capital withdrawals.

The Brandes Global Equity Composite seeks to achieve long-term capital appreciation by investing in the equity securities of U.S. and non-U.S. issuers whose equity market capitalizations exceed \$5 billion at the time of purchase. Generally, no more than 30% of the composite total assets, measured at the time of purchase, may be invested in securities of companies located in emerging and frontier countries throughout the world.

From 2013 through 2019 composite performance after management fee returns were determined by reducing the gross of fee returns monthly by the highest applicable fee schedule per account. As of October 2019, actual fees are used with the exception of select portfolios to which the applicable fee schedule was applied for the entire year to better reflect our typical management fees. For periods where actual fees were used to calculate the net return, a model fee representing the standard fee schedule is applied to any non-fee paying accounts included in the composite. Standard fee schedule - First \$25 million 0.75%; Next \$25 million 0.60%; Next \$50 million 0.50%; Next \$50 million 0.45%; Amounts over \$150 million 0.40%. Brandes' investment advisory fees are detailed in Part 2A of its Form ADV.

Brandes claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brandes has been independently verified for the annual periods 1995 through 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global Equity Composite has had a performance examination for the periods 1985-2022. The verification and performance examination reports are available upon request.

A list of composite and limited distribution pooled fund descriptions, a list of broad distribution pooled funds, and policies for valuing investments, calculating performance, and preparing GIPS Reports, are available upon request. For the period from 1/1/06-12/31/17 the SMA Division of Brandes was excluded from the GIPS firm definition. The firm was redefined to reflect the dissolution of the SMA Division and the firm bringing those former SMA Division assets into compliance with the GIPS Standards.

This composite was created in 1995. The inception date is 12/31/1994.

Prior to April 2014 accounts were removed from the composite when an account's market value falls below US\$50,000 due to capital withdrawals.

The Brandes International Small Cap Equity Composite seeks to achieve long-term capital appreciation by investing primarily in equity securities of non-U.S. issuers with equity market capitalizations of \$2.5 billion or less at the time of purchase. Generally, no more than 30% of the value of the composite's total assets, measured at the time of purchase, may be invested in securities of companies located in emerging and frontier countries markets throughout the world. Small capitalization securities involve greater issuer risk than large capitalization securities, and the markets for such securities may be more volatile and less liquid.

From 2013-2014 composite performance after management fee returns were determined by reducing the gross of fee returns monthly by the highest applicable fee schedule per account. From 2015-2018 composite performance after management fee returns were calculated using actual fees. As of October 2019, composite performance after management fee returns were determined by using the actual fees, with the exception of select portfolios to which the applicable fee schedule was applied for the entire year to better reflect our typical management fees. For periods where actual fees were used to calculate the net return, a model fee representing the standard fee schedule is applied to any non-fee paying accounts included in the composite.

Standard fee schedule - First \$25 million 0.95%; Next \$25 million 0.90%; Amounts over \$50 million 0.80%. Brandes' investment advisory fees are detailed in Part 2A of its Form ADV.

Brandes claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Brandes has been independently verified for the annual periods 1995 through 2022.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Investors should not rely on prior performance results as a reliable indication of future results.

In April 2024 the Brandes International Small Cap Equity Composite benchmark changed from the S&P Developed Ex U.S. SmallCap Index to the MSCI ACWI ex USA Small Cap Index, retroactively effective to the inception date of the composite. Brandes believes that the new benchmark is a better representative of the strategy's investment process and is therefore a more suitable measurement for performance.

(a) The MSCI ACWI ex USA Small Cap Index with net dividends captures small-cap representation across developed and emerging markets excluding the United States. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products. The benchmark returns are not covered by the report of independent verifiers.

This material is intended for informational purposes only. The information provided in this material should not be considered a recommendation to purchase or sell any particular security. It should not be assumed that any security transactions, holdings, or sectors discussed were or will be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance discussed herein. Portfolio holdings and allocations are subject to change at any time. Strategies discussed herein are subject to change at any time by the investment manager in its discretion due to market conditions or opportunities. The Brandes investment approach tends to result in portfolios that are materially different than their benchmarks with regard to characteristics such as risk, volatility, diversification, and concentration. Market conditions may impact performance. It is not possible to invest directly in an index. Diversification does not assure a profit or protect against loss. The securities identified and described do not represent all of the securities purchased, sold, or recommended for advisory accounts. The viewer should not assume that an investment in the securities identified was or will be profitable. Stocks of small-sized and mid-sized companies tend to have limited liquidity and usually experience greater price volatility than stocks of larger companies.

International and emerging markets investing is subject to certain risks such as currency fluctuation and social and political changes, differences in financial reporting standards and less stringent regulation of securities markets which may result in greater share price volatility; such risks are increased when investing in emerging markets. Additional risks associated with emerging markets investing include smaller-sized markets, liquidity risks, and less established legal, political, social, and business systems to support securities markets. Some emerging markets countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Certain of these currencies have experienced, and may experience in the future, substantial fluctuations or a steady devaluation relative to the U.S. dollar. Frontier markets are less advanced capital markets from the developing world. They are countries with investable stock markets that are less established than those in emerging markets.

Past performance is not a guarantee of future results. The performance results presented were achieved in particular market conditions which may not be repeated. Moreover, the current market volatility and uncertain regulatory environment may have a negative impact on future performance.
