Dear Fellow Investor,

The net asset value of the Brandes International Equity Fund (Class I Shares) gained 35.59% in the six months ended March 31, 2023. During the same period, the MSCI EAFE Index gained 27.27%.

Performance was boosted by Fund holdings in the United Kingdom, led by industrials firm **Rolls-Royce**. Rolls-Royce continued to recover from the downturn in demand for long-haul air travel. It posted improved operating results and has been awarded with new contracts over the last several months, strengthening expectations for free-cash-flow generation.

In addition to the U.K., holdings in France (e.g., pharmaceutical firm Sanofi) and Germany (e.g., software company SAP) also contributed to returns.

From an industry standpoint, cyclically geared holdings performed well. These included advertising agencies **WPP** and **Publicis**, as well as construction materials companies **HeidelbergCement** (Germany), **Buzzi Unicem** (Italy), and **Cemex** (Mexico). Financial holdings **Intesa Sanpaolo** (Italy) and **Mitsubishi UFJ Financial Group** (Japan) also helped performance. Furthermore, all of our European grocer and retail holdings increased in the period, led by U.K.-based **J Sainsbury**, Marks and Spencer, and **Tesco**, as well as France-based **Carrefour**, which announced improved earnings and a significant share repurchase program.

Other positive contributors included Brazilian regional jet manufacturer **Embraer**, which remained on track in its post-COVID rebound, with deliveries for business and commercial jets continuing to increase. Additionally, one of its competitors announced it had officially shut down its next-generation commercial regional jet program, which could leave Embraer to be the primary supplier in this market.

The most significant detractor in the period was Switzerland-based **Credit Suisse**, which declined as customer outflows led to a forced discounted takeover by its competitor **UBS** (also a holding in the Fund). See more details in the Select Portfolio Activity section below as we divested our holding in the first quarter.

Beyond Credit Suisse, other detractors declined modestly. These included Brazilian oil and gas firm **Petroleo Brasileiro** and French commercial services and supplies business **Societe BIC.**

Select Portfolio Activity

During the period, the investment committee initiated positions in two emerging market-based semiconductor-related companies, namely **Taiwan Semiconductor Manufacturing Company** (TSMC) and South Korea's **Samsung.**

Taiwan Semiconductor Manufacturing Company (TSMC) is the cost and technology leader in fabricating semiconductors for a variety of global technology companies, including Apple, Huawei, and Qualcomm. The firm's scale and technology advantages

Past performance is not a guarantee of future results.

have helped it gain market share over the past decade, making TSMC the dominant provider of leading-edge semiconductors and enabling it to generate solid cash flows and returns on capital. The company now manufactures a substantial portion of the chips pivotal in the megatrends of the next decade, such as artificial intelligence, machine learning, cloud, electric and autonomous vehicles, and improved energy efficient devices.

Our opportunity to invest in the company came amid worries about heightened geopolitical tension between the U.S. and China, as well as concerns about softening demand and an oversupply of semiconductors following a catch-up in production after the semiconductor shortage last year. In our view, these well-known concerns have suppressed the stock price too far. Even though weaker demand in the slowing smartphone market and intensifying competition in non-leading edge segments present headwinds, notwithstanding the China concerns, we believe TSMC is well positioned to capitalize on appealing long-term growth potential from increasing silicon demand across a variety of applications (high-performance computing, internet of things, and automotive semiconductors). In our opinion, TSMC is one of the most attractively valued and sustainable franchises in the global semiconductor industry, with a capability to continue generating robust returns on capital and free cash flows going forward.

Samsung, as one of the world's largest technology companies, operates across a variety of end markets (e.g., memory, smartphones, other electronics). It is a leading player in the semiconductor foundry market along with TSMC, and similarly its shares have been hurt by a downturn in semiconductor pricing. The company is also the dominant player in the global computer memory storage market, in which its scale and low-cost position have allowed it to produce healthy cash flows and returns on capital. The operating landscape for memory storage market has improved over the last decade as the sub-industry has consolidated to three major players (Samsung, SK Hynix and Micron Technology). Recently, however, Samsung's memory business has also been struggling with excess capacity and weakening demand.

Despite the challenges in its end markets, Samsung is, in our opinion, likely to benefit from several secular trends in technology, including cloud computing, artificial intelligence, 5G, and autonomous computing, all of which should spur long-term demand growth for foundry services and memory storage devices. Its strong foothold in the memory storage sub-industry, which has enjoyed faster revenue growth than the overall semiconductor industry over the past 20 years, has led us to be optimistic about Samsung's prospects. Given the impact of short-term concerns around a downturn in semiconductor and memory demand and pricing, combined with the company's current valuation and long-term growth potential, Samsung offers an appealing value opportunity to us.

As mentioned, we divested our position in Credit Suisse. Among our European financials holdings, we had a relatively low allocation to Credit Suisse given its much

higher risk profile as it was undergoing a significant restructuring and had seen client outflows during the fourth quarter of 2022. We had maintained a small position in the company as we believed its wealth management and domestic Swiss bank franchises were potentially significantly undervalued, and with the company trading at approximately 20% of tangible book value, the market appeared to be giving little to no credit for a potential recovery.

During the first quarter of 2023, as concerns of a banking crisis in the U.S. increased, Credit Suisse saw its share price drop due to its weaker position relative to other European banks. A comment from its largest shareholder exacerbated an already nervous market, causing Credit Suisse's share-price decline and client deposit outflows to snowball. While the company's capital levels and liquidity appeared solid, the intensified market dynamics and the deep restructuring the company had been undergoing left minimal margin for error at Credit Suisse, eventually leading to a decision by the Swiss National Bank and the Swiss regulatory agency to broker a takeover of the company by UBS at a significant discount in order to quell the panic.

As the International Equity Fund already held an allocation to UBS and given that it seemed Credit Suisse would not have been able to survive on its own due the client outflows, the investment committee decided to divest its position in Credit Suisse. We will continue to monitor the situation closely as events unfold and details of the takeover emerge but given some of the attractive assets at Credit Suisse, combined with the liquidity and loss support from the Swiss government, we believe this transaction should likely be favorable for UBS in the long term.

Looking Forward

As of March 31, 2023, the Brandes International Equity Fund continued to have overweight positions in France and emerging markets, and underweight positions in Australia and Japan. From a sector perspective, it held key overweights to communication services, health care, and consumer staples, while maintaining meaningful underweights to technology and industrials.

Additionally, we have an underweight to financials vs. MSCI EAFE Index. Within our financials exposure, we have a slightly higher allocation to European banks than the benchmark. Based on our analysis, our European bank holdings generally have strong liquidity, diversified deposit bases, and differentiated security/asset exposures. They can also access capital more easily than their U.S. peers as the regulatory liquidity tests tend to be more stringent in Europe than in the United States. Furthermore, our European bank holdings still appear positively geared to benefit from higher rates.

As several U.S.-based banks entered FDIC receivership during the quarter, our financials research team and investment committee have been meeting frequently as they monitored ongoing developments. We have been updating our valuation and risk

exposure analysis across a variety of financials holdings and have been in contact with several global financial companies via email, phone, and in-person meetings at financial conferences.

Three months into 2023, a variety of issues facing international stocks have persisted, including elevated inflation, slowing economic growth/recession concerns, and political as well as regulatory uncertainties. Despite these challenges, international stocks (MSCI EAFE) posted positive returns in the period, highlighting our belief that often when the market is the most negative, it can be a great time to invest.

Even with their rally and outperformance vs. U.S. stocks (Russell 1000), we believe international stocks in general—and our Fund in particular—continue to offer an attractive long-term risk/reward tradeoff at today's valuation levels. Note that within the international equity space, value stocks (MSCI EAFE Value) continue to trade in the highest quintile of discount levels to the broader market on a variety of valuation metrics (e.g., forward price/earnings, price/cash flows, enterprise value/sales), which should bode well, in our opinion, for the long-term potential of value stocks.

We believe the Brandes International Equity Fund is well positioned and we remain optimistic about its long-term prospects.

Sincerely yours,

The Brandes International Large-Cap Investment Committee

Cash Flow: The amount of cash generated minus the amount of cash used by a company in a given period.

Enterprise Value: Market capitalization plus debt, minority interest and preferred shares, minus total cash and cash equivalents.

Enterprise Value/Sales (EV/Sales): Compares the enterprise value of a company to its annual sales.

Forward Price/Earnings: Price per share divided by expected earnings per share expected over the next 12 months or next fiscal year.

Free Cash Flow: Total cash flow from operations less capital expenditures.

Price/Cash Flow: Price per share divided by cash flow per share.

Tangible Book Value: Book value minus intangible assets (e.g., goodwill).

Past performance is not a guarantee of future results.

Diversification does not assure a profit or protect against a loss.

Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. The values of the Fund's investments fluctuate in response to the activities of individual companies and general stock market and economic conditions. In addition, the performance of foreign

securities depends on the political and economic environments and other overall economic conditions in the countries where the Fund invests. Emerging country markets involve greater risk and volatility than more developed markets. Some emerging markets countries may have fixed or managed currencies that are not free-floating against the U.S. dollar. Certain of these currencies have experienced, and may experience in the future, substantial fluctuations or a steady devaluation relative to the U.S. dollar. Value stocks typically are less volatile than growth stocks; however, issues of value stocks typically have a lower expected growth rate in earnings and sales than issues of growth stocks.

Please refer to the Schedule of Investments in the report for complete holdings information. Fund holdings, geographic allocations and/or sector allocations are subject to change at any time and are not considered a recommendation to buy or sell any security.

The foregoing reflects the thoughts and opinions of Brandes Investment Partners® exclusively and is subject to change without notice.

⁽¹⁾ The inception date is January 2, 1997.

⁽²⁾ Performance shown prior to January 31, 2011 for Class A shares reflects the performance of Class I shares adjusted to reflect Class A expenses.

⁽³⁾ Performance shown prior to January 31, 2013 for Class C shares reflects the performance of Class I shares adjusted to reflect Class C expenses. The Class C shares' average annual total return for the 10-year period assumes that Class C shares automatically converted to Class A shares 8 years after the start of the period.

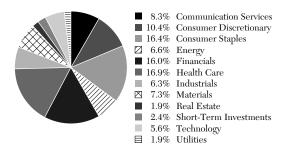

The Class C shares' average annual total return for the since inception period cannot be calculated as the Class A shares did not yet exist 8 years after the Fund's inception date.

(4) Performance shown prior to February 1, 2016 for Class R6 shares reflects the performance of Class I shares adjusted to reflect Class R6 expenses.

Performance data quoted represents past performance; past performance does not indicate future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800-331-2979.

The returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Brandes Investment Partners, L.P., the Advisor, has a fee waiver arrangement in place to limit the Fund's annual operating expenses.

Sector Allocation as a Percentage of Total Investments as of March 31, 2023 (Unaudited)

The sector classifications represented in the graph above are in accordance with Global Industry Classification Standard (GICS $^{\otimes}$), which was developed by and/or is the exclusive property of MSCI, Inc. and Standard & Poor's Financial Services LLC.

Dear Fellow Investor,

The net asset value of the Brandes Global Equity Fund (Class I Shares) increased 26.06% in the six months ended March 31, 2023. During the same period, the MSCI World Index increased 18.25%.

During the period, the Fund's strongest performers included industrials holdings **Rolls-Royce**, **Embraer**, and **FedEx**.

U.K.-based Rolls-Royce continued to recover from the downturn in demand for long-haul air travel. The company posted improved operating results and has won new contracts over the past several months, strengthening expectations for free-cash-flow generation.

Similarly, Brazilian regional jet manufacturer Embraer remained on track in its post-COVID rebound, with deliveries for business and commercial jets continuing to increase. Additionally, one of its competitors announced it had officially shut down its next-generation commercial regional jet program, which could leave Embraer to be the primary supplier in this market.

Meanwhile, global shipping and distribution company FedEx released improved results after cutting costs and saw its share price rally.

Other solid contributors included German multinational building materials company **HeidelbergCement,** France-based advertising agency **Publicis**, and Mexico-based real estate investment trust (REIT) **Fibra Uno.**

Our overweight to the banking industry hurt relative returns. The most significant detractors included large regional banks **PNC** and **Truist Financial**. In response to pervasive negativity affecting the financials sector, our research team and investment committee met frequently as they monitored ongoing developments, updated our valuation estimates, evaluated risk exposures of our holdings, and identified potential long-term opportunities. Based on our analysis, we reallocated across some of our financials holdings, favoring large money center and trust banks given their attractive valuations and what we consider lower relative risk versus regional banks (see Select Activity).

Relative to the benchmark, our underweight to information technology weighed on performance as it was the best-performing sector within the MSCI World Index in the period.

Select Portfolio Activity

During the period, the investment committee initiated positions in Singapore-based bank **DBS Group**, U.S. IT services firm **Cognizant**, and France-based luxury goods company **Kering**. Additionally, the committee purchased shares of two semiconductor-related companies, namely **Taiwan Semiconductor Manufacturing Company** (TSMC) and U.S.-based **Micron**.

Past performance is not a guarantee of future results.

DBS Group is one of Southeast Asia's largest banks, with operations that extend to China, Hong Kong, Taiwan, and South Korea. Thanks to its strong deposit franchise, low-cost funding base, and attractive fee-generating business from its wealth management unit, DBS has been able to produce what we consider attractive returns on equity while offering appealing dividend yield of over 5%. Although the company trades at a single-digit multiple of earnings, our analysis implies it can continue to benefit from a rising or higher interest rate environment. Based on its risk profile, compelling valuations, and its history of returning capital to shareholders, we decided to initiate a position in DBS.

TSMC is the cost and technology leader in fabricating semiconductors for a variety of global technology companies, including Apple, Huawei, and Qualcomm. The firm's scale and technology advantages have helped it gain market share over the past decade, making TSMC the dominant provider of leading-edge semiconductors and enabling it to generate solid cash flows and returns on capital. The company now manufactures a substantial portion of the chips pivotal in the megatrends of the next decade, such as artificial intelligence, machine learning, cloud, electric and autonomous vehicles, and improved energy-efficient devices.

Our opportunity to invest in the company came amid concern about softening demand and an oversupply of semiconductors following a catch-up in production after the semiconductor shortage last year and worries about heightened geopolitical tension between the U.S. and China. In our view, these well-known concerns have suppressed the stock price too far. Even though weaker demand in the slowing smartphone market and intensifying competition in non-leading edge segments present headwinds, notwithstanding the China concerns, we believe TSMC is well positioned to capitalize on appealing long-term growth potential from increasing silicon demand across a variety of applications (high-performance computing, internet of things, and automotive semiconductors). In our opinion, TSMC is one of the most attractively positioned and sustainable franchises in the global semiconductor industry, with a capability to continue generating robust returns on capital and free cash flows going forward

Kering is a luxury apparel company whose top brands include Gucci, Saint Laurent, Balenciaga and Bottega Veneta. Amid inflation concerns, China's zero-COVID policy and slowing economic growth, Kering's shares traded lower during the period and became available at what we consider a meaningful discount to their historical averages, just 14x forward earnings. We appreciate Kering's long-term growth potential and history of attractive returns on capital, as well as the fact that it operates in an industry with high barriers to entry. At its current valuations, the stock represents a compelling value opportunity to us.

We divested our holdings in Truist Financial, defense company **General Dynamics**, South Korean memory manufacturer **SK Hynix**, and U.K. grocer **Tesco**.

After reviewing our overall banking exposure, we decided to reallocate capital toward our money center and trust bank holdings and simultaneously sold our position in regional bank Truist. We made this decision based on Truist's heightened risk exposure and a potential increase in regulatory scrutiny for regional banks that have not faced the same level of liquidity and stress testing as large money center banks.

Meanwhile, General Dynamics reached our estimate of its intrinsic value. We initiated our position during the market downturn in 2020. Since then, General Dynamic's share price has appreciated on an improved environment for defense-related stocks, with its forward price-to-earnings increasing to over 18x from approximately 12x at the time of our purchase.

We divested our holding in SK Hynix and added Micron given the similar overall exposures, but relatively more attractive risk exposures of Micron relative to SK Hynix. These include Micron's stronger balance sheet, the increasing investment in U.S. semiconductor manufacturing, and SK Hynix's heightened risk from its exposure to China and increased U.S. regulatory crackdown on semiconductor exports to China.

Longer term, we believe Micron should continue to benefit from several secular trends in technology, including cloudcomputing, artificial intelligence, 5G and autonomous computing. Given the impact of short-term concerns affecting memory demand and pricing, coupled with the company's current valuation and long-term growth potential, Micron offers an appealing risk/reward tradeoff, in our opinion.

Looking Forward

As of March 31, 2023, the Brandes Global Equity Fund held its key positions in the economically sensitive financials and energy sectors, and the more defensive health care sector. Our largest sector underweight was to the technology sector, which given its solid performance during the period, rose to over a 20% allocation in the MSCI World Index. Meanwhile, our allocation to that sector increased modestly during the past year and was slightly below half the index weighting.

Geographically, we continued to hold overweight positions in the United Kingdom, France and emerging markets but were underweight Japan and the United States.

A variety of headwinds face stocks around the world today, including elevated inflation, potentially increasing interest rates, slowing economic growth and recession concerns, commodity price volatility, and political and regulatory risks. That is why we think that at today's valuations, value stocks—and our Fund in particular—offer an attractive long-term opportunity. It's important to emphasize that our overall positioning is driven from the bottom up, on a company-by-company basis, with a focus on pursuing long-term results. We take into account the economic concerns noted above when evaluating a potential investment, estimating the impact they may have on each investment's intrinsic value.

Global value stocks (MSCI World Value) continued to trade in the cheapest quintile relative to growth stocks (MSCI World Growth Index) across a variety of valuation metrics (e.g., price/earnings, price/cash flow, enterprise value/sales). Discounts experienced previously at today's levels have often portended attractive returns over a long-term time horizon for value stocks, and the Fund has historically tended to do well when value stocks have done well.

Looking ahead, we remain optimistic about the prospects for the Brandes Global Equity Fund given its current valuation and company fundamentals, as well as its tendency to outperform the MSCI World Value Index when it outperforms the benchmark. We believe the differences between the Fund and the broader market continue to make it an intelligent complement to index-tracking or growth-oriented alternatives. We remain excited about the Fund's potential.

Sincerely yours,

The Brandes Global Large-Cap Investment Committee

Brandes Investment Trust

Cash Flow: The amount of cash generated minus the amount of cash used by a company in a given period.

Sector Allocation as a Percentage of Total Investments as of March 31, 2023 (Unaudited)

The sector classifications represented in the graph above are in accordance with Global Industry Classification Standard ($GICS^{\circledast}$), which was developed by and/or is the exclusive property of MSCI, Inc. and Standard & Poor's Financial Services LLC.

Dear Fellow Investor,

The net asset value of the Brandes Emerging Markets Value Fund (Class I Shares) increased 27.68% in the six months ended March 31, 2023. During the same period, the MSCI Emerging Markets Index gained 14.04%.

Holdings in Latin America helped performance, including Mexico-based cement company **Cemex** and real estate investment trusts **Fibra Uno** and **Terrafina**, as well as Brazilian regional jet manufacturer **Embraer**.

Embraer posted solid results for the fourth quarter of 2022, with revenue and free cash flow ahead of consensus and operating margin improving sequentially across segments. The company provided increased guidance for aircraft deliveries in 2023 in both the commercial and executive divisions. Moreover, one of its competitors announced it had officially shut down its next-generation commercial regional jet program, which could leave Embraer to be the primary supplier in this market.

Similarly, Cemex benefited from an enhanced outlook for 2023, with pricing remaining robust and management optimistic on growth in the industrial and commercial sectors.

From a sector perspective, we saw solid contributions from select information technology holdings, such as Taiwan-based Wiwynn, Accton Technology, and Taiwan Semiconductor Manufacturing Company, as well as South Korea's Samsung Electronics. Other notable performers included South Korean steelmaker POSCO and China-based Alibaba, whose announcement of a six-way split and potential IPOs (initial public offering) of each segment was well received by the market.

The largest detractors telecommunication services providers **Indus Towers** (India) and **XL Axiata** (Indonesia). Additionally, Brazilian oil and gas firm **Petroleo Brasileiro** and India's **IndusInd Bank** declined modestly.

Select Portfolio Activity

During the period, the emerging markets investment committee initiated positions in Indian electric utility **NTPC Limited** and Brazilian electric utility **Neoenergia**. Meanwhile, divested positions included China-based **Weichai Power** and **Genertec Universal Medical Group**, Thailand's **Bangkok Bank**, and Taiwanese Largan Precision.

NTPC Limited, formerly known as the National Thermal Power Corporation, is India's largest electric utility, accounting for about a quarter of the country's power generation and over 15% of its installed capacity. The Government of India holds a controlling, but declining stake in NTPC (89.5% stake at the company's 2004 IPO to currently 51.1%). Over 97% of NTPC's capacity operates under cost-of-service regulation, while the remaining installed capacity comprising renewable energy is being developed on a competitive basis. As part of India's environmental commitment to fight global warming, NTPC plans to add 60GW of renewable energy by 2032 to reach 50% of its

Past performance is not a guarantee of future results.

installed capacity.

Until recently, NTPC suffered a decade-long derating due to adverse regulatory changes and revenue shortfalls in addition to the recurrent overhang from the government gradually reducing its stake. The company also struggled with the stigma associated with its large exposure to coal-based electricity generation. In our view, one of the main uncertainties was the lack of clarity regarding the role the government envisioned for NTPC in India's decarbonization strategy. This concern has been alleviated now that it is clear NTPC will be a leading participant and possibly become the largest developer of renewable capacity in the country, and it will invest significant capital expenditure to retrofit its entire coal-based fleet under regulated returns with good visibility for cost recovery. Hence, the transition from coal to renewable energy has gone from posing a potentially existential threat for NTPC to providing a significant opportunity supporting earnings growth potential in the foreseeable future.

While these positive developments have not gone unnoticed by the market, upside potential persists as NTPC represents, in our opinion, an opportunity to invest in a "growth" utility at "value" or discounted multiples.

Neoenergia is Brazil's second-largest distribution utility that derives more than 80% of operating profits from its regulated distribution and transmission networks. Based on our analysis, the company is a high-quality operator with an efficient cost structure, allowing it to outperform regulatory returns. It has a large presence in Brazil's Northeast region, where per capita electricity consumption is below the country's average and the concessions offer above-average expansion opportunities to enlarge the regulatory asset base. The combination of organic growth opportunities and efficient operations in its core regulated networks has proven to be a powerful driver of sustainable shareholder value creation and earnings growth for Neoenergia.

In our view, Neoenergia's market price reflects investor worries over capital allocation, temporarily elevated leverage (a function of peak-growth capital expenditure), and corporate governance. We believe these issues have suppressed the stock price too low and see attractive upside potential from the continuation of strong EBITDA growth driven by inflation-protected revenues, efficient investments in the regulatory asset base, and the start-up of new transmission lines and renewable energy projects. The completion of these projects should improve Neoenergia's leverage ratios and cash flows, and potentially enable the company to adopt a higher dividend payout above the minimum level presently. Overall, we believe the stock offers an opportunity to invest in an undervalued quality name with an attractive earnings growth profile.

Looking Forward

The positioning of the Fund's portfolio did not meaningfully change during the period. As of March 31, 2023, the Brandes Emerging Markets Value Fund remained underweight China (although Chinese companies made up our largest country allocation), India, Saudi Arabia, and Taiwan, while having significant overweights to

Mexico, Brazil, Panama, and Indonesia. On a sector basis, the Fund held large overweights to real estate (outside China), industrials, and consumer discretionary, while maintaining key underweights to materials and energy.

Given the volatility and headlines surrounding the financials sector globally, we'd be remiss not to mention our exposure. At quarter end, the Fund held a lower allocation to financials than the MSCI Emerging Markets Index's weighting (18.5% vs. 21.0%). Our financials research team and investment committee have been meeting frequently as they monitored ongoing developments. We have been updating our valuation and risk exposure analysis across a variety of financial holdings and have been in contact with several global financial companies via email, phone, and in-person meetings at financial conferences. We believe the risk of permanent, fundamental impairment stemming from issues similar to those faced by Silicon Valley Bank and other struggling banks remains low for the financial institutions we own specifically within the Fund.

We remain optimistic about the long-term prospects of the Brandes Emerging Markets Value Fund.

Sincerely yours,

The Brandes Emerging Markets Investment Committee

Brandes Investment Trust

Cash Flow: The amount of cash generated minus the amount of cash used by a company in a given period.

EBITDA: Earnings before interest, taxes, depreciation and amortization.

Free Cash Flow: Total cash flow from operations less capital expenditures.

Operating Profit: Earnings before interests and taxes.

Operating Margin: Operating income divided by net sales; used to measure a company's operating efficiency.

Past performance is not a guarantee of future results.

Diversification does not assure a profit or protect against a loss.

Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. The values of the Fund's investments fluctuate in response to the activities of individual companies and general stock market and economic conditions. In addition, the performance of foreign securities depends on the political and economic environments and other overall economic conditions in the countries where the Fund invests. Emerging markets involve greater risk and volatility than more developed markets. Some emerging markets may have fixed or managed currencies that are not free-floating against the U.S. dollar. Certain of these currencies have experienced, and may experience in the future, substantial fluctuations or a steady devaluation relative to the U.S. dollar. Investments

in small and medium capitalization companies tend to have limited liquidity and greater price volatility than investments in larger capitalization companies. Value stocks typically are less volatile than growth stocks; however, issues of value stocks typically have a lower expected growth rate in earnings and sales than issues of growth stocks.

⁽¹⁾ Prior to January 31, 2011, the Advisor managed a private investment fund with an investment objective, investment policies and strategies that were, in all material respects, equivalent to those of the Brandes Emerging Markets Value Fund. The performance information shown for the Class I shares for periods before January 31, 2011 is that of the private investment fund and reflects the net expenses of the private investment fund. The performance of the private investment fund prior to January 31, 2011 is based on a calculation method that is different from the standardized calculation method prescribed by the SEC. The performance information shown for the Class A shares has been adjusted to reflect the differences in

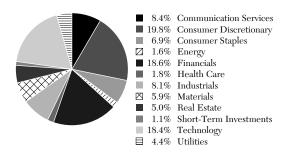

the net expense ratios between the Class I and A shares. The private investment fund was not registered under the Investment Company Act of 1940 ("1940 Act") and was not subject to certain investment limitations, diversification requirements, and other restrictions imposed by the 1940 Act and the Internal Revenue Code of 1986, which, if applicable, may have adversely affected its performance.

- (2) The inception date is August 20, 1996.
- (3) Performance shown prior to January 31, 2013 for Class C shares reflects the performance of Class I shares adjusted to reflect Class C expenses. The Class C shares' average annual total return for the 10-year period assumes that Class C shares automatically converted to Class A shares 8 years after the start of the period. The Class C shares' average annual total return for the since inception period cannot be calculated as the Class A shares did not yet exist 8 years after the Fund's inception date.
- (4) Performance shown prior to July 11, 2016 for Class R6 shares reflects the performance of Class I shares adjusted to reflect Class R6 expenses.

Performance data quoted represents past performance; past performance does not indicate future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800-331-2979.

The returns shown do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Brandes Investment Partners, L.P., the Advisor, has a fee waiver arrangement in place to limit the Fund's annual operating expenses.

Sector Allocation as a Percentage of Total Investments as of March 31, 2023 (Unaudited)

The sector classifications represented in the graph above are in accordance with Global Industry Classification Standard ($GICS^{\otimes}$), which was developed by and/or is the exclusive property of MSCI, Inc. and Standard & Poor's Financial Services LLC.

Dear Fellow Investor,

The net asset value of the Brandes International Small Cap Equity Fund (Class I Shares) advanced 38.33% in the six months ended March 31, 2023. During the same period, the S&P Developed Ex-U.S. SmallCap Index advanced 23.76%.

Holdings in Latin America helped performance, led by Mexico-based cement company **Cemex** and real estate investment trust **Fibra Uno**, Chilean electric utility **Enel Chile**, and Brazilian regional jet manufacturer **Embraer**. Luxembourg-domiciled telecom firm **Millicom International**, which operates entirely in Latin America, also aided returns.

Embraer posted solid results for the fourth quarter of 2022, with revenue and free cash flow ahead of consensus and operating margin improving sequentially across segments. The company provided increased guidance for aircraft deliveries in 2023 in both the commercial and executive divisions. Moreover, one of its competitors announced it had officially shut down its next-generation commercial regional jet program, which could leave Embraer to be the primary supplier in this market.

Similarly, Cemex benefited from an enhanced outlook for 2023, with pricing remaining robust and management optimistic on growth in the industrial and commercial sectors.

Other contributors included U.K.-based retailers **J Sainsbury** and **Marks and Spencer**. Additionally, industrial firm **Rolls-Royce**, also based in the U.K., continued to recover from the downturn in demand for long-haul air travel. The company reported improved operating results and has been awarded with new contracts over the last several months, strengthening expectations for free-cash-flow generation.

From a sector perspective, holdings in industrials, consumer staples, real estate, and communication services drove returns.

The largest detractors from performance were U.K.-based banknotes printing company **De La Rue**, Israel-based **Taro Pharmaceuticals**, and Canadian household durables company **Dorel Industries**.

Dorel Industries declined on disappointing results for the fourth quarter of 2022 amid lower sales in its juvenile products and home furnishing divisions. The company has started implementing measures to cut costs and reduce inventories, which should help earnings going forward.

While most of the Fund's holdings in Japan performed well, electrical equipment firm **Futaba Corporation** declined in the period.

Select Portfolio Activity

The small-cap investment committee initiated a position in Brazilian electric utility **Neoenergia** and Spain-based biopharmaceutical company **Grifols.** Meanwhile,

divested positions included Japanese bank **Concordia Financial Group,** Turkey-based food products company **Ulker Biskuvi Sanayi** and Italian bank **Credito Emiliano**.

Neoenergia is Brazil's second-largest distribution utility that derives more than 80% of operating profits from its regulated distribution and transmission networks. Based on our analysis, the company is a high-quality operator with an efficient cost structure, allowing it to outperform regulatory returns. It has a large presence in Brazil's Northeast region, where per capita electricity consumption is below the country's average and the concessions offer above-average expansion opportunities to enlarge the regulatory asset base. The combination of organic growth opportunities and efficient operations in its core regulated networks has proven to be a powerful driver of sustainable shareholder value creation and earnings growth for Neoenergia.

In our view, investor concerns, including capital allocation risk, temporarily elevated leverage (a function of peak-growth capital expenditure), and corporate governance have driven down Neoenergia's market price more than is warranted. We see attractive upside from the potential for continued EBITDA growth driven by inflation-protected revenues, efficient investments in the regulatory asset base, and the start-up of new transmission lines and renewable energy projects. The completion of these projects should improve Neoenergia's leverage ratios and cash flows, and potentially enable the company to adopt a higher dividend payout above the minimum level presently. Overall, we believe the stock offers an opportunity to invest in what we consider an undervalued company with an attractive earnings growth profile.

Grifols develops, manufactures, and distributes biological medicines derived from blood plasma. Processing blood plasma is a capital intensive and highly regulated industry that is an oligopoly comprised of three vertically integrated players (including Grifols). The industry enjoys attractive long-term growth prospects because an aging patient population and the chronic nature of most illnesses treated by the drugs have resulted in a stable demand.

Grifols has been materially affected by COVID-19 as initial shelter-in place orders and government financial support to individuals led to a significant drop in plasma collection in 2020 and 2021. While plasma collections are recovering, we believe the resulting impact to Grifols' financial results should not be expected to be seen until next year because plasma-derived products require a six-month quarantine before they can be sold. Additionally, in anticipation of an increase in long-term demand for blood plasma-derived products, Grifols has been ramping up its spending to build more collection centers, which has hurt its short-term results and increased its balance sheet leverage. Longer-term, we believe Grifols offers an attractive opportunity given the likelihood of blood-plasma supply recovery and the potential improvement of the company's margins and earnings from today's depressed levels.

Looking Forward

The positioning of the portfolio did not change materially during the period. As of March 31, 2023, the Brandes International Small Cap Equity Fund held its key overweights to consumer staples, communication services, health care, and financials, while maintaining significant underweights to technology, consumer discretionary, and materials. We continued to have overweight positions in Ireland, the U.K., Hong Kong, and emerging markets, and underweight positions in Canada, Australia, Switzerland, and Japan.

Given the volatility and headlines surrounding the financials sector globally, we believe it is important to mention our exposure. At quarter end, the Fund had a higher allocation to financials than the benchmark's 11.65% weighting. Our financials research team and investment committee have been meeting frequently as they monitored ongoing developments. We have been updating our valuation and risk exposure analysis across a variety of financials holdings and have been in contact with several global financial companies via email, phone, and in-person meetings at financial conferences. We believe the risk of permanent, fundamental impairment stemming from issues like those faced by Silicon Valley Bank and other struggling banks remains low for the financial institutions we own specifically within the Fund.

We continue to believe the portfolio's current positioning offers an attractive opportunity for long-term investors and remain optimistic about its prospects.

Sincerely yours,

The Brandes Small-Cap Investment Committee

Sector Allocation as a Percentage of Total Investments as of March 31, 2023 (Unaudited)

The sector classifications represented in the graph above are in accordance with Global Industry Classification Standard ($GICS^{\circledast}$), which was developed by and/or is the exclusive property of MSCI, Inc. and Standard & Poor's Financial Services LLC.

Dear Fellow Investor,

The net asset value of the Brandes Small Cap Value Fund (Class I Shares) rose 23.52% in the six months ended March 31, 2023. During the same period, the Russell 2000 Index increased 9.14%.

Holdings in industrials drove returns, led by aerospace and defense companies **Embraer**, **Moog**, and **Park Aerospace**, as well as machinery firm **Graham Corporation** and commercial furnishing business **Kimball International**.

Embraer posted solid results for the fourth quarter of 2022, with revenue and free cash flow ahead of consensus and operating margin improving sequentially across segments. The company provided increased guidance for aircraft deliveries in 2023 in both the commercial and executive divisions. Moreover, one of its competitors announced it had officially shut down its next-generation commercial regional jet program, which could leave Embraer to be the primary supplier in this market.

In early March, Kimball International agreed to be acquired by office furnishing company HNI in a transaction valued at \$485 million. Kimball's share price increased over 80% on the news and we divested our position.

Other notable performers included insurers **National Western Life Group** and **Crawford & Company**, as well as surveillance and security company **Arlo Technologies**. Arlo Technologies rallied on fourth quarter 2022 results and a revenue forecast for the first quarter of 2023 that exceeded sell-side estimates.

The largest detractors from performance included U.S. health care equipment & supplies company **LENSAR** and holdings in the consumer discretionary sector, namely **Hanesbrands** and **Dorel Industries.**

Dorel Industries declined on disappointing results for the fourth quarter of 2022 due to lower sales in its juvenile products and home furnishing divisions. The company has started implementing measures to cut costs and reduce inventories, which should help earnings going forward.

In the first quarter of 2023, the failure of two crypto-related banks and the heavily venture-concentrated Silicon Valley Bank (SVB) triggered concerns about deposit outflows and longer-duration investments held at other small and regional banks. This backdrop negatively affected the share price of **Eagle Bancorp Montana**.

Amid the concern and negativity in the broad financials sector, our research team and investment committee met frequently as they monitored ongoing developments, updated our valuation estimates, and evaluated risk exposures of our current holdings as well as potential opportunities. As a result of our analysis, we made a decision to sell our position in **ACNB Corporation** given the shift in its risk profile.

Select Portfolio Activity

During the period, the small cap investment committee initiated positions in **Elanco Animal Health** and Eagle Bancorp Montana, while divesting from machinery firm **Miller Industries**, homebuilders **Taylor Morrison Home (TMHC)** and **M.D.C. Holdings**, as well as the aforementioned Kimball International and ACNB Corporation.

Elanco Animal Health was spun out of Eli Lilly in September 2018. Through a series of acquisitions, most recently Bayer Animal Health in 2020, Elanco has become a global animal health business with a diversified product portfolio that includes medicinal feed, parasiticides (flea and tick products), vaccines, and other therapeutic drugs. The firm is now the world's second-largest animal health care company by sales and has a 55/45 revenue split between the U.S. and international markets.

While the integration of Bayer Animal Health has been going well, we believe its overhang, coupled with slower revenue growth in recent years, has created the opportunity to invest in Elanco. Key factors that underlie our investment thesis include:

- \bullet Mid-single digit potential growth throughout the industry stemming from a global increase in protein consumption and pet ownership;
- Stable sales due to the strong brand name, diverse portfolio, and lack of patent cliffs;
- \bullet Likelihood of profit margin expansion from streamlining manufacturing, research and development (R&D), and procurement;
- Less expensive and shorter-duration R&D with a higher probability of success compared to human pharmaceuticals;
- Potential for continued financial deleveraging.

At current valuations, we believe the stock represents an appealing risk/reward tradeoff.

In the roughly 15 years since the Global Financial Crisis, the Fund's portfolio had always owned at least one homebuilder. Over time, the Fund's allocation to and selection of homebuilder holdings has changed based on company-specific execution, regional differences in activity and market perception. However, following the sale of TMHC and M.D.C. Holdings, the Fund no longer has exposure to homebuilders.

TMHC was first added to the portfolio in 2017. The company completed its initial public offering in 2013 and subsequently restructured its operations through a series of acquisitions and divestitures. TMHC's footprint in the southwest, Texas and the southeast underpinned its recovery as those regions continued to have faster-than-average population growth. When TMHC was first purchased, the U.S. housing market was still recovering and was approaching our estimate of normal cyclically adjusted housing starts. Additionally, TMHC had built an inventory of land at low prices due to the slow recovery of the sector and had exited its Canadian housing

construction business. These factors, along with what we considered a discounted market valuation, made TMHC an attractive investment opportunity.

The pandemic initially resulted in a slowdown in housing activity, but that situation quickly reversed and the housing market became turbocharged as a result of low interest rates and increased demand for single family homes. TMHC now screens as a traditional value stock. The company trades at low valuation multiples measured on price-to-earnings and price-to-book-value metrics. New housing starts in the U.S. are close to what we consider to be normal. Despite these positive characteristics, the risks of slowing demand and the potential for asset impairment from inflated land values threatened to overwhelm these apparent advantages, in our view.

In years past, steeply discounted market valuations have more than compensated the portfolio for holding a homebuilder while heading into a housing slowdown. While the housing market recovery from the Global Financial Crisis was not a straight-line recovery—nor did we ever expect it to be—current market valuations do not offer the discount we need to "wait it out" as we have done in the past.

Looking Forward

As of March 31, 2023, the Fund's largest sector allocations were in industrials and health care. Our most significant underweights were in financials, consumer discretionary, and utilities. Given concerns about inflation and a weakening economic environment, we have remained careful about our exposure to companies that could be hurt by continued inflation or those with significant balance sheet leverage.

A variety of headwinds face stocks today: for example, elevated inflation and/or potentially increasing interest rates, slowing economic growth and recession concerns, energy risk, and political and regulatory risks, to name a few. We believe that at today's valuations, value stocks—and our portfolio in particular—offer an attractive long-term opportunity. It's important to remember that our overall positioning is driven from the bottom up, on a company-by-company basis, with a focus on the long term. We take into account many of the economic concerns noted above when we are evaluating a potential investment, estimating the impact they may have on each investment's intrinsic value.

We believe the differences between the Brandes Small Cap Value Fund and the broader U.S. small cap market continue to make the Fund an attractive complement to more index-like or growth-oriented alternatives. We remain excited about the portfolio's future potential.

Sincerely yours,

The Brandes Small-Cap Investment Committee

⁽¹⁾ The inception date is September 30, 1997.

⁽²⁾ Prior to January 2, 2018, the Advisor managed a private investment fund with an investment objective, investment policies and strategies that were, in all material respects, equivalent to those of the Brandes Small Cap Value Fund. The performance information shown for the Class I shares for periods before January 2, 2018 is that of the private investment fund and reflects the net expenses of the private investment fund. The performance of the private investment fund prior to January 2, 2018 is based on a calculation method that is different from the standardized calculation method prescribed by the SEC.

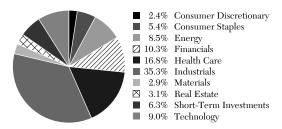

The performance information shown for the Class A shares has been adjusted to reflect the differences in the net expense ratios between the Class I and A shares.

(3) Performance shown prior to January 2, 2018 for Class R6 shares reflects the performance of Class I shares. The private investment fund was not registered under the Investment Company Act of 1940 ("1940 Act") and was not subject to certain investment limitations, diversification requirements, and other restrictions imposed by the 1940 Act and the Internal Revenue Code of 1986, which, if applicable, may have adversely affected its performance.

Performance data quoted represents past performance; past performance does not indicate future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 800-331-2979.

The returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. Brandes Investment Partners, L.P., the Advisor, has a fee waiver arrangement in place to limit the Fund's annual operating expenses.

Sector Allocation as a Percentage of Total Investments as of March 31, 2023 (Unaudited)

The sector classifications represented in the graph above are in accordance with Global Industry Classification Standard ($GICS^{\circledast}$), which was developed by and/or is the exclusive property of MSCI, Inc. and Standard & Poor's Financial Services LLC.

Brandes U.S. Value Fund

Dear Fellow Investor,

The net asset value of the Brandes U.S. Value Fund (Class I Shares) advanced 15.64% in the six months ended March 31, 2023. During the same period, the Russell 1000 Value Index advanced 13.55%.

Select technology-related holdings helped returns, including **Micron Technology**, **Applied Materials, Open Text**, and **Alphabet**. Micron saw its share price rise despite releasing widely expected weak financial results as the market became more optimistic that we are nearing the bottom of the current memory products cycle.

Other contributors included media companies **Omnicom** and **Comcast**, as well as energy equipment and services business **Halliburton**. Additionally, global shipping and distribution firm **FedEx** increased after it released positive financial results which showed it had successfully cut costs.

Amid the downfall of two crypto-related banks, and the heavily venture-concentrated Silicon Valley Bank, and concerns about deposit outflows and longer-duration investments held at other small and regional banks, our holdings in **PNC** and **Truist** declined.

With the concern and negativity in the broad financials sector, our research team and investment committee met frequently as they monitored ongoing developments, updated our valuation estimates, and evaluated risk exposures of our current holdings as well as potential opportunities. As a result of our analysis, we re-allocated across some of our financials holdings, favoring money center and trust banks given their attractive valuations and what we consider lower relative risk exposures compared to regional banks.

Other detractors included several health care holdings such as **Cigna**, **Pfizer**, and **CVS Health**. As the health care providers and services declined in the period, our overweight to the industry hurt relative performance.

Select Portfolio Activity

During the period, the investment committee initiated a position in France-based pharmaceutical firm **Sanofi** and divested the Fund's position in U.S.-based **Taylor Morrison Home Corp** (TMHC).

TMHC was first added to our Fund just over five years ago. The company completed its initial public offering in 2013 and subsequently restructured its operations through a series of acquisitions and divestitures. TMHC's footprint in the Southwest, Texas, and the Southeast underpinned its recovery as those regions continued to have faster than average population growth. When we first purchased TMHC, the U.S. housing market was still in the process of recovering to our estimate of normal cyclically adjusted housing starts. Additionally, TMHC built an inventory of land at low prices due to the slow recovery of the sector and had recently exited the Canadian housing construction

Past performance is not a guarantee of future results.

Brandes U.S. Value Fund

business. These factors, along with what we considered a discounted market valuation, made TMHC an attractive investment opportunity.

While the pandemic initially resulted in a slowdown in housing activity, it soon reversed course and the housing market became turbocharged with low interest rates and increased demand for single family homes. Today, TMHC still screens as a traditional value stock and trades at low valuation multiples measured both on price-to-earnings and price-to-book-value metrics. New housing starts in the U.S. are close to what we consider to be normal. However, despite these positive characteristics, the risks of slowing demand and the potential for asset impairment from inflated land values threaten to overwhelm the upside potential. Consequently, the investment committee sold TMHC as it approached our estimate of its intrinsic value.

Looking Forward

As of March 31, 2023, the Fund's largest overweight positions remained in the economically sensitive financials sector, albeit heavily weighted to large money center and trust banks, and the more defensive health care sector. Relative to the Russell 1000 Value Index, we were also significantly overweight technology companies as the sector only accounted for approximately 8% of the index (vs. approximately 25% of the broader Russell 1000 Index).

Our most significant underweights were in consumer staples, utilities, and real estate. These sectors generally appear expensive as, from our perspective, investors are overpaying for perceived defensiveness amid an expected economic downturn. We continue to be careful with our exposure to companies that may be hurt by elevated inflation or those with balance sheet leverage, and instead seek value in the traditionally defensive health care sector.

While a variety of headwinds face stocks today (e.g., elevated inflation and/or potentially increasing interest rates, slowing economic growth and recession concerns, commodity price volatility, and political and regulatory risks (just to name a few)), we believe that at today's valuations, value stocks—and the Fund's portfolio in particular—offer an attractive long-term opportunity. It's important to remember that our overall positioning is driven from the bottom up, on a company-by-company basis with a focus on long-term fundamentals. We take into account the economic concerns noted above when we are evaluating a potential investment, estimating the impact they may have on each investment's intrinsic value.

U.S. value stocks (MSCI USA Value) continue to trade in the cheapest quintile relative to growth stocks (MSCI USA Growth) across a variety of valuation metrics (e.g., price/earnings, price/cash flow, enterprise value/sales). The discounts at today's levels have often portended attractive returns over a long-term time horizon for U.S. value stocks, and the strategy has a historical tendency to do well when value stocks do well.

We believe the differences between the Brandes U.S. Value Fund and the broader U.S. market continue to make the Fund an attractive complement to more index-like or growth-oriented alternatives. We remain excited about the Fund's future potential.

Sincerely yours,

The Brandes Global Large-Cap Investment Committee

Brandes Investment Trust

Cash Flow: The amount of cash generated minus the amount of cash used by a company in a given period.

Enterprise Value: Market capitalization plus debt, minority interest and preferred shares, minus total cash and cash equivalents.

Enterprise Value/Sales: Compares the enterprise value of a company to its annual sales.

 ${\it Price/Book: Price per share \ divided \ by \ book \ value \ per \ share.}$

Price/Cash Flow: Price per share divided by cash flow per share.

Price/Earnings: Price per share divided by earnings per share.

Past performance is not a guarantee of future results.

Diversification does not assure a profit or protect against a loss.

Because the values of the Fund's investments will fluctuate with market conditions, so will the value of your investment in the Fund. You could lose money on your investment in the Fund, or the Fund could underperform other investments. The values of the Fund's investments fluctuate in response to the activities of individual companies and general stock market and economic conditions. Value stocks typically are less volatile than growth stocks; however, issues of value stocks typically have a lower expected growth rate in earnings and sales than issues of growth stocks.

Dear Fellow Investor,

In the six months ended March 31, 2023, the Brandes Core Plus Fixed Income Fund (Class I Shares) increased 5.39%, while its benchmark, the Bloomberg Barclays U.S. Aggregate Bond Index, increased 4.89%.

The fixed income market experienced considerable volatility in interest rates during the first quarter of 2023. Economic reports largely confirmed the continued resilience of the U.S. economy, while inflation figures were hotter than expected. Continued hawkish central bank commentary early in the quarter lifted the 10-year U.S. Treasury bond yield from a January low of 3.50% to a high of 4.06% later that month. Market sentiment changed again in early March with the failure of Silicon Valley Bank (SVB). This led to a mini crisis of confidence in other regional banks, as well as in Credit Suisse and the broader financial system causing U.S. Treasury yields to decline meaningfully into the end of the quarter.

At quarter-end, the market expectation was for the Fed (Federal Reserve Bank) to lower the fed funds rate by nearly 75 basis points by year-end. However, not a single Fed governor has projected a lower fed funds rate this year, suggesting that the bar for easing policy remains high in the minds of Fed officials.

We've talked repeatedly over the past year about the push and pull between the market and the Fed. After experiencing two months when the market seemed finally to have bought into the Fed's guidance, we find ourselves once again with a meaningful disconnect between the market's expectations for Fed policy and the Fed's formal guidance for the balance of the year.

Based on its price action, the interest rate market seems to assume that slowing growth and a potential recession will be sufficient for the Fed to win the fight against inflation, bringing it down to its stated target of 2%, from its latest measurement of around 6%. However, inflation in the important services sector has shown scant evidence of slowing.

Looking back to the 1970s the U.S. economy experienced "stagflation": a period of recession and elevated inflation. One school of thought holds that it was the Fed's expansionary monetary policy at the time that was to blame. If that lesson has been learned, then it may be premature to expect that an imminent recessionary environment would or should trigger a Fed pivot to an accommodative stance.

Outside of the impacted financial sectors, credit markets (and indeed equities overall) seemed to take the interest rate gyrations in their stride. Credit yield spreads were modestly wider, while the broad equity indices posted positive performance. Overall, financial markets appear to want to experience all the pleasure of a Fed pivot to policy easing while ignoring the root causes of potential economic pain that would justify that more accommodative stance.

Select Portfolio Activity

Fund activity was modest during the six months ending March 31, 2023. Late in February as the 10-year U.S. Treasury yield was near its short-term high of around 4.0%, we used the opportunity to adjust the duration of the Fund upwards by approximately 5% -moving the duration relative to the benchmark from 80% to 85%.

Towards the end of the first quarter, amidst the volatility in bank credit spreads the Fund added to existing holdings in **Bank of America Corp** (4.45% coupon, maturing 3/3/26, rated Baa1/BBB+), and **Citigroup** (4.40% coupon, maturing 6/10/25, rated Baa2/BBB).

In the fourth quarter 2022, the Fund added new positions in **Expedia Group** (3.25% coupon, maturing 2/15/30, rated Baa3/BBB-), and **Carnival Corp.** (2nd lien issue, 9.875% coupon, maturing 8/1/27, rated B1/BB-).

While there were no outright sales, the Fund did experience a full call of our **JPMorgan** floating rate note, which had been a holding for a long period.

Outlook

A key question for the market is whether the failure of SVB was an example of idiosyncratic risk or was it the tip of an iceberg, signaling more systemic risks.

Now that SVB's business model has been exposed publicly, its strategy appears frankly to have been absurd, in our view. Ramp up deposits in a parabolic fashion primarily from technology companies that tend to move cash in sync and with terrifying speed (so much for diversification). Then invest in long duration bonds while interest rates are at historic lows (so much for asset-liability matching). Finally, avoid hedging the interest rate risk, presumably because everyone knows that higher inflation is transitory, ensuring an environment of permanently low rates (so much for risk management).

Thankfully the broader banking system appears to be in better shape. The largest banks have more diversified deposit bases and bigger capital buffers. Households and businesses are in better shape than in the last banking crisis, and there does not appear to be a housing bubble like we experienced in 2008 - inflated back then by opaque, complex, and illiquid financial instruments.

Fed officials have sought to further calm markets by guaranteeing deposits at SVB and floating the idea of guaranteeing all deposits across the banking system. The potential unintended consequences from the Fed and the federal government throwing a lifeline to the financial system in times of crisis remains an issue for the market as we move forward. One thing that is evident over the past 15 years of easy money is that when the financial world feels safer, investors appear to get lulled into complacency and hence extend their risk tolerances.

We have emphasized in recent commentaries our belief that markets are transitioning back to an environment where fundamental research and individual security selection are at a premium. We are leaving behind an extended period where less emphasis was

placed on credit specific fundamentals because the unprecedentedly accommodative macro policies overwhelmed fundamentals and largely ensured that everything worked.

We witnessed examples of this transition in the performance of several regional bank bonds, but nowhere was it more evident than the price action in Credit Suisse AT1 bonds. These Credit Suisse bonds had a little-known provision in the bond indenture that allowed them to be wiped out before common equity in the event of a corporate restructuring. This caught the market off guard since bonds typically only bear losses in a restructuring after common and preferred equity are wiped out. The practical impact was that the prices of this class of Credit Suisse bonds – with nearly \$7.5 billion outstanding - declined by over 90% in March.

The takeaway in our view is that deep, measured, fundamental research is essential as we move forward in an environment where idiosyncratic risks appear to be on the rise.

For a considerable period now, we have attempted to tilt the Brandes Core Plus Fixed Income Fund into what we believe is a defensive posture in order to mitigate some of the potential detrimental impact of rising interest rates and widening yield spreads. We believe that this remains a risk. Accordingly, the Fund continues to favor shorter-maturity corporate bonds and those that we believe exhibit strong, tangible asset coverage. While we made a modest extension to duration in the quarter, we are still managing duration toward the shorter end of our duration-controlled range. We have a meaningful allocation to U.S. Treasuries and if recent market uncertainty and volatility continue to cause credit fundamentals to become mispriced relative to our estimates of intrinsic value, then we will look to redeploy some of those Treasury holdings thoughtfully and effectively to take advantage of opportunities.

We remain underweight agency mortgage-backed securities.

As we move forward, we believe prudence dictates that we continue our search for value in a measured and deliberate manner while continuing to tilt the Fund to what we believe is a relatively defensive posture.

We remain optimistic about the prospects for the Brandes Core Plus Fixed Income Fund.

Sincerely yours,

The Brandes Fixed Income Investment Committee

Brandes Investment Trust

Asset Coverage: Measures how well a company can repay its debts by selling or liquidating its assets.

Basis Point (BPS): 1/100 of 1%.

Cash Flow: The amount of cash generated minus the amount of cash used by a company in a given period.

Coupon: The annual interest rate paid on a bond, expressed as a percentage of the face value and paid from issue date until maturity.

Credit Spread: The difference in yield between two bonds of similar maturity but different credit quality.

Duration: The weighted maturity of a fixed-income investment's cash flows, used in the estimation of the price sensitivity of fixed-income securities for a given change in interest rates.

Floating Rate: A debt instrument that does not have a fixed rate of interest over the life of the instrument.

Idiosyncratic Risk: The risk that is endemic to a particular asset and not a whole investment portfolio.

Systemic Risk: The risk Inherent to the entire market or market segment.

Yield: Annual income from the investment (dividend, interest, etc.) divided by the current market price of the investment.

Yield Spread: The net difference between two interest-bearing instruments of varying maturities, credit ratings, issuer or risk level.

Past Performance is not a guarantee of future results.

Diversification does not assure a profit or protect against a loss in a declining market.

Because the values of the fund's investments will fluctuate with market conditions, so will the value of your investment in the fund. You could lose money on your investment in the fund, or the fund could underperform other investments. The values of the fund's investments fluctuate in response to the activities of individual companies and general bond market and economic conditions. Investments in small and medium capitalization companies tend to have limited liquidity and greater price volatility than large capitalization companies.

As with most fixed income funds, the income on and value of your shares in the fund will fluctuate along with interest rates. When interest rates rise, the market prices of the debt securities the fund owns usually decline. When interest rates fall, the prices of these securities usually increase. Generally, the longer the fund's average portfolio maturity and the lower the average quality of its portfolio, the greater the price fluctuation. The price of any security owned by the fund may also fall in response to events affecting the issuer of the security, such as its ability to continue to make principal and interest payments or its credit rating. Below investment grade debt securities are speculative and involve a greater risk of default and price change due to changes in the issuer's creditworthiness than higher grade debt. The market prices of these debt securities may fluctuate more than the market prices of investment grade debt securities and may decline significantly in periods of general economic difficulty.

Bond credit ratings are grades given to bonds that indicate their credit quality as determined by a private independent rating service. The firm evaluates a bond issuer's financial strength, or its ability to pay a bond's principal and interest in a timely fashion. Credit ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). All Fund securities except for those labeled "Not Rated" and "Other" have been rated by Moody's, S&P or Fitch, which are each a Nationally Recognized Statistical Rating Organization. All Index securities except for those labeled "Not Rated" have been rated by Moody's or S&P. Credit ratings are subject to change.

Index securities except for those labeled "Not Rated" have been rated by Moody's or S&P. Credit ratings are subject to change.

Please refer to the Schedule of Investments in the report for complete holdings information. Fund holdings, geographic allocations and/or sector allocations are subject to change at any time and are not considered a recommendation to buy or sell any security.

Expense Example (Unaudited)

As a shareholder of a Fund, you incur ongoing costs, including investment advisory and administrative fees and other fund expenses. The examples below are intended to help you understand your ongoing costs (in dollars) of investing in the Funds and to compare these costs with ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from October 01, 2022 to March 31, 2023 (the "Period").

Actual Expenses

This section provides information about actual account values and actual expenses. The "Ending Account Value" shown is derived from each Fund's actual return. You may use the information in this section, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for the Fund under the heading "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

The Fund's expenses are equal to the Fund's expense ratio for the period, multiplied by the average account value over the period, multiplied by 182/365 (to reflect the one half-year period).

Hypothetical Example for Comparison Purposes

This section provides information about hypothetical account values and hypothetical expenses based on the Funds' actual expense ratios and an assumed rate of return of 5% per year before expenses, which are not the Funds' actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Funds and other mutual funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other mutual funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as brokerage commissions on purchase and sales of Fund shares. Therefore, the last column of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION

The Brandes International Equity Fund (the "International Fund"), the Brandes Global Equity Fund (the "Global Fund"), the Brandes Emerging Markets Value Fund (the "Emerging Markets Fund"), the Brandes International Small Cap Equity Fund (the "International Small Cap Fund"), the Brandes Small Cap Value Fund (the "Small Cap Value Fund"), the Brandes U.S. Value Fund (the "U.S. Value Fund") and the Brandes Core Plus Fixed Income Fund (the "Core Plus Fund") (each a "Fund" and collectively the "Funds") are series of Brandes Investment Trust (the "Trust"). The Trust is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, open-end management investment company.

The International Fund, Global Fund, Emerging Markets Fund, International Small Cap Fund, Small Cap Value Fund, U.S. Value Fund and Core Plus Fund began operations on January 2, 1997, October 6, 2008, January 31, 2011, February 1, 2012, January 2, 2018, October 1, 2021 and December 28, 2007, respectively. Prior to January 31, 2011 for the Emerging Markets Fund, February 1, 2012 for the International Small Cap and January 2, 2018 for the Small Cap Value Fund, these Funds' portfolios were managed as private investment funds with investment objectives, investment policies and strategies that were, in all material respects, equivalent to those of the Emerging Markets Fund, International Small Cap Fund and Small Cap Value Fund, respectively.

The International Fund, Emerging Markets Fund and International Small Cap Fund have four classes of shares: Class A, Class C, Class I and Class R6. The Global Fund has three classes of shares: Class A, Class C and Class I. The Small Cap Value Fund, U.S. Value Fund and Core Plus Fund have three classes of shares: Class A, Class I and Class R6.

The International Fund and Global Fund invest their assets primarily in equity securities of issuers with market capitalizations greater than \$5 billion. The International, International Small Cap and Emerging Markets Funds invest their assets in securities of foreign companies, while the Global Fund invests its assets in securities of foreign and domestic companies. The Small Cap Value Fund invests primarily in U.S. equity securities of issuers with market capitalizations \$5 billion or less. The U.S. Value Fund invests primarily in U.S. equity securities of issuers with market capitalizations greater than \$5 billion. The Core Plus Fund invests predominantly in debt securities issued by U.S. and foreign companies and debt obligations issued or guaranteed by the U.S. Government and foreign governments and their agencies and instrumentalities.

NOTE 2 – SIGNIFICANT ACCOUNTING POLICIES

Each Fund is an investment company that applies the accounting and reporting guidance issued in Topic 946, "Financial Services-Investment Companies", by the Financial Accounting Standards Board ("FASB"). The following is a summary of

NOTES TO FINANCIAL STATEMENTS — (continued)

significant accounting policies consistently followed by the Funds. These policies are in conformity with generally accepted accounting principles ("GAAP") in the United States of America.

- Repurchase Agreements. Each Fund may enter into repurchase agreements with government securities dealers recognized by the Federal Reserve Board, with member banks of the Federal Reserve System or with other brokers or dealers that meet the credit guidelines established by the Board of Trustees. Each Fund will always receive and maintain, as collateral, U.S. Government securities whose market value, including accrued interest (which is recorded in the Schedules of Investments), will be at least equal to 100% of the dollar amount invested by the Fund in each agreement, and the Fund will make payment for such securities only upon physical delivery or upon evidence of book entry transfer to the account of the Fund's custodian. If the term of any repurchase transaction exceeds one business day, the value of the collateral is marked-to-market on a daily basis to ensure the adequacy of the collateral. Before causing a Fund to enter into a repurchase agreement with any other party, the investment advisor will determine that such party does not have any apparent risk of becoming involved in bankruptcy proceedings within the time frame contemplated by the repurchase agreement. If the seller defaults and the value of the collateral declines, or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited. At March 31, 2023, the Funds did not invest in repurchase agreements.
- B. Foreign Currency Translation and Transactions. Values of investments denominated in foreign currencies are converted into U.S. dollars using the spot market rates of exchange at the time of valuation. Purchases and sales of investments and dividend and interest income are translated into U.S. dollars using the spot market rates of exchange prevailing on the respective dates of such translations. The gain or loss resulting from changes in foreign exchange rates is included with net realized and unrealized gain or loss from investments, as appropriate. Foreign securities and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin.

Foreign securities are recorded in the financial statements after translation to U.S. dollars based on the applicable exchange rate at the end of the period. The Funds report certain foreign currency-related transactions as components of realized gains or losses for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

C. Delayed Delivery Securities. The Funds may purchase securities on a when issued or delayed delivery basis. "When-issued" or delayed delivery refers to

NOTES TO FINANCIAL STATEMENTS — (continued)

securities whose terms are available and for which a market exists, but that have not been issued. For a when-issued or delayed delivery transaction, no payment is made until delivery date, which is typically longer than the normal course of settlement. When a Fund enters into an agreement to purchase securities on a when-issued or delayed delivery basis, the Fund segregates cash or liquid securities, of any type or maturity, equal in value to the Fund's commitment. Losses may arise if the market value of the underlying securities changes, if the counterparty does not perform under the contract, or if the issuer does not issue the securities due to political, economic, or other factors. The Funds did not have any open commitments on delayed delivery securities as of March 31, 2023.

- D. Zero Coupon Bonds. The Funds may invest without limit in so-called zero coupon bonds. Zero coupon bonds are issued at a significant discount from their principal amount in lieu of paying interest periodically. Because zero coupon bonds do not pay current interest in cash, their value is subject to greater fluctuation in response to changes in market interest rates than bonds that pay interest currently. Zero coupon bonds allow an issuer to avoid the need to generate cash to meet current interest payments. Accordingly, such bonds may involve greater credit risks than bonds paying interest currently in cash. A Fund is required to accrue interest income on such investments and to distribute such amounts at least annually to shareholders even though the investments do not make any current interest payments. The daily market quotations of the original bonds may include the accrued interest (referred to as a dirty price) and require a pro rata adjustment, if any, from the unrealized appreciation (depreciation) on investments to interest receivable on the Statements of Assets and Liabilities
- E. Participatory Notes. The International, Global, Emerging Markets, International Small Cap, Small Cap Value and U.S. Value Funds may invest in participatory notes. Participatory notes are derivative securities which are designed to provide synthetic exposure to one or more underlying securities, subject to the credit risk of the issuing financial institution.

Investments in participatory notes involve risks normally associated with a direct investment in the underlying securities. In addition, participatory notes are subject to counterparty risk, which is the risk that the broker-dealer or bank that issues the notes will not fulfill its contractual obligation to complete the transaction with the Trust. Participatory notes constitute general unsecured, unsubordinated contractual obligations of the banks or broker-dealers that issue them and generally are issued as an actual note from the financial intermediary or an equity linked warrant (commonly known as a low exercise price option). The Trust is relying on the creditworthiness of such banks or broker-dealers and has no rights under a participatory note against

NOTES TO FINANCIAL STATEMENTS — (continued)

the issuer of the securities underlying such participatory note. The investment advisor has established guidelines for monitoring participatory note exposure for the Funds. Prior to investment in a participatory note, the investment advisor will complete an analysis of the prospective counterparties and once purchased, will continue to monitor creditworthiness on a quarterly basis. The investment advisor requires a minimum credit rating for such counterparties (as determined by rating agencies such as Moody's, Fitch and S&P) of A.

The Funds record counterparty credit risk valuation adjustments, if material, on the participatory notes in order to appropriately reflect the credit quality of the counterparty.

The International, Global, Emerging Markets, International Small Cap, Small Cap Value and U.S. Value Funds did not invest in any participatory notes at March 31, 2023.

- Investment Transactions. Dividends and Distributions. F. Investment transactions are accounted for on the trade dates. Realized gains and losses are evaluated on the basis of identified cost. Dividend income and distributions to shareholders are recorded on the ex-dividend dates. Interest is recorded on an accrual basis. Other non-cash dividends are recognized as investment income at the fair value of the investment received. Withholding taxes on foreign dividends and capital gains, which are included as a component of net investment income and realized gain (loss) on investments, respectively, have been provided for in accordance with the Trust's understanding of the applicable country's tax rules and rates. Each Fund's investment income, expenses, other than class specific expenses, and realized and unrealized gains and losses are allocated daily to each class of the Fund's shares based upon the relative net asset values of outstanding shares of each class of shares at the beginning of the day (after adjusting for the current capital shares activity of the respective class). Expenses common to the Funds' portfolios are allocated among the Funds based upon their relative net asset values or other appropriate allocation methods. The Funds amortize premiums and accrete discounts using the constant yield method.
- G. Concentration of Risk. As of March 31, 2023, the International, Global, Emerging Markets and International Small Cap Funds held significant portions of their assets in foreign securities. Certain price and foreign exchange fluctuations as well as economic and political situations in the foreign jurisdictions could have an impact on the International, Global, Emerging Markets and International Small Cap Funds' net assets. The investment advisor monitors these off-balance sheet risks.
- H. Use of Estimates. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect

NOTES TO FINANCIAL STATEMENTS — (continued)

the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

- I. Securities Lending. The Funds may lend their portfolio securities to banks, brokers and dealers. Lending Fund securities exposes the Fund to risks such as the following: (i) the borrower may fail to return the loaned securities, (ii) the borrower may not be able to provide additional collateral, or (iii) the Funds may experience delays in recovery of the loaned securities or loss of rights in the collateral if the borrower fails financially.
 - To minimize these risks, the borrower must agree to maintain collateral with the Fund's custodian, marked to market daily, in the form of U.S. Government obligations, in an amount at least equal to 102% (105% in the case of loans of foreign securities not denominated in U.S. dollars) of the market value of the loaned securities. As of March 31, 2023, the Global Fund, Emerging Markets Fund, International Small Cap Fund, Small Cap Value Fund, U.S. Value Fund, and Core Plus Fund did not have any securities on loan. The International Fund had securities on loan as of March 31, 2023. The market value of securities loaned is \$9,774,512 and received non-cash collateral for the loans in the amounts of \$10,720,122. Non-cash collateral received by a Fund may not be sold or re-pledged except to satisfy a borrower default. Therefore, non-cash collateral is not included on the Funds' Schedules of Investments or Statements of Assets and Liabilities.
- J. Indemnification Obligations. Under the Trust's organizational documents, its current and former officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. The Trust has indemnified its trustees against any expenses actually and reasonably incurred by the trustees in any proceeding arising out of or in connection with the trustees' service to the Trust. In addition, in the normal course of business, the Trust enters into contracts that contain a variety of representations and warranties and provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred or that would be covered by other parties.
- K. Accounting for Uncertainty in Income Taxes. Each Fund has elected to be taxed as a "regulated investment company" and intends to distribute substantially all its taxable income to its shareholders and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. The Funds may be subject to a nondeductible excise tax calculated as a percentage of certain undistributed amounts of net

NOTES TO FINANCIAL STATEMENTS — (continued)

investment income and net capital gains. The Funds intend to distribute their net investment income and capital gains as necessary to avoid this excise tax. Therefore, no provision for federal income taxes or excise taxes has been made.

The Trust analyzes all open tax years, as defined by the applicable statute of limitations, for all major jurisdictions. Open tax years for the Funds are those that are open for exam by taxing authorities (2019 through 2022). As of March 31, 2023 the Trust has no examinations in progress.

Management has analyzed the Trust's tax positions, and has concluded that no liability should be recorded related to uncertain tax positions expected to be taken on the tax return for the fiscal year ended September 30, 2022.

The Trust identifies its major tax jurisdictions as the U.S. Government and the State of California. The Funds are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

L. Fair Value Measurements. The Trust has adopted GAAP accounting principles related to fair value accounting standards which establish a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1—Fair value measurement within Level 1 should be based on an unadjusted quoted price in an active market that the Funds have the ability to access for the asset or liability at the measurement date. Because a quoted price alone forms the basis for the measurement, the access requirement within Level 1 limits discretion in pricing the asset or liability, including in situations in which there are multiple markets for the asset or liability with different prices and no single market represents a principal market for the asset or liability. Importantly, the FASB has indicated that when a quoted price in an active market for a security is available, that price should be used to measure fair value without regard to an entity's intent to transact at that price.

Level 2—Fair value measurement within Level 2 should be based on all inputs other than unadjusted quoted prices included within Level 1 that are observable for the asset or liability. Other significant observable market inputs include quoted prices for similar instruments in active markets, quoted adjusted prices in active markets, quoted prices for identical or similar

NOTES TO FINANCIAL STATEMENTS — (continued)

instruments in markets that are not active, and model derived valuations in which the majority of significant inputs and significant value drivers are observable in active markets.

Level 3—Fair value measurement within Level 3 should be based on unobservable inputs in such cases where markets do not exist or are illiquid. Significant unobservable inputs include model derived valuations in which the majority of significant inputs or significant value drivers are unobservable. Unobservable inputs are those inputs that reflect the Fund's own assumptions that market participants would use to price the asset or liability based on the best available information.

M. Security Valuation. Common and preferred stocks, exchange-traded funds and financial derivative instruments, such as futures contracts and options contracts that are traded on a national securities or commodities exchange, are valued at the last reported sales price at the close of regular trading on each day the exchange is open for trading, in the case of common stocks and exchange-traded funds, or, in the case of futures contracts or options contracts, the settlement price determined by the relevant exchange. Securities listed on the NASDAQ National Market System for which market quotations are readily available are valued using the NASDAQ Official Closing Price. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level 1 of the fair value hierarchy.

Equity securities traded on an exchange for which there have been no sales on the valuation date are generally valued at the mean between last bid and ask price on such day and are categorized as Level 2 of the fair value hierarchy, or are fair valued by the Advisor.

Investments in registered open-end management investment companies are valued based upon the Net Asset Values ("NAVs") of such investments and are categorized as Level 1 of the fair value hierarchy.

Valuation adjustments may be applied to certain common and preferred stocks that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the close of the New York Stock Exchange ("NYSE"). These securities are generally valued using pricing service providers that consider the correlation of the trading patterns of the foreign securities to the intraday trading in the U.S. markets for investments. Securities using these valuation adjustments are categorized as Level 2 of the fair value hierarchy. As of March 31, 2023, the International Fund, Global Fund, Emerging Markets Fund and International Small Cap Fund had securities with market values of \$537,194,991,

NOTES TO FINANCIAL STATEMENTS — (continued)

\$20,174,320, \$487,912,662 and \$161,299,415 that represent 86.96%, 48.91%, 68.35%, and 54.82% of each Fund's net assets, respectively, that were fair valued using these valuation adjustments.

Fixed income securities (other than repurchase agreements and demand notes) including corporate, convertible and municipal bonds and notes, U.S. government agencies, U.S. Treasury obligations, sovereign issues, bank loans, convertible preferred securities, fixed income securities purchased on a delayed delivery basis and non-U.S. bonds are normally valued on the basis of quotes obtained from brokers and dealers or independent pricing services or sources. Independent pricing services typically use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. The service providers' internal models use inputs that are observable such as, among other things, issuer details, interest rates, yield curves, prepayment speeds, credit risks/ spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Rights that are traded on a national securities exchange are valued at the last reported sales price at the close of regular trading on each day the exchange is open. A right is a privilege offered by a corporation to its shareholders pro rata to subscribe to a certain security at a specified price, often for a short period. Rights may or may not be transferable. Rights that use such valuation techniques and inputs are categorized as Level 2 of the fair value hierarchy.

Mortgage and asset-backed securities are usually issued as separate tranches, or classes, of securities within each package of underlying securities. These securities are also normally valued by pricing service providers that use broker-dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche level attributes, estimated cash flows and market based yield spreads for each tranche, and current market data and incorporate packaged collateral performance, as available. Mortgage and asset-backed securities that use such valuation techniques and inputs are categorized as Level 2 of the fair value hierarchy.

Repurchase agreements and demand notes, for which neither vendor pricing nor market maker prices are available, are valued at amortized cost on the day of valuation, unless Brandes Investment Partners, L.P. (the "Advisor") determines that the use of amortized cost valuation on such day is not appropriate (in which case such instrument is fair valued in accordance with the fair value procedures of the Trust). Repurchase agreements and demand notes that use such valuation techniques and inputs are categorized as Level 2 of the fair value hierarchy.

NOTES TO FINANCIAL STATEMENTS — (continued)

The Board of Trustees has designated the Advisor as the valuation designee pursuant to Rule 2a-5 under the 1940 Act to perform fair value determinations relating to any or all Fund investments. Certain securities may be fair valued in accordance with the fair valuation procedures approved by the Board of Trustees. The Advisor is generally responsible for overseeing the day-to-day valuation processes and the Board of Trustees oversees the Advisor in its role as valuation designee in accordance with the requirements of Rule 2a-5 under the 1940 Act. The Advisor is authorized to make all necessary determinations of the fair value of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable. The securities fair valued by the Advisor are indicated in the Schedules of Investments and are categorized as Level 2 or Level 3 of the fair value hierarchy. Certain vendor priced securities may also be considered Level 3 if significant unobservable inputs are used by the vendors.

In using fair value pricing, each Fund attempts to establish the price that it might reasonably have expected to receive upon a sale of the security at 4:00 p.m. Eastern time. Valuing securities at fair value involves greater reliance on judgment than valuation of securities based on readily available market quotations. A Fund using fair value to price securities may value those securities higher or lower than another fund using market quotations or fair value to price the same securities. Further, there can be no assurance that the Fund could obtain the fair value assigned to a security if it were to sell the security at approximately the time at which the Fund determines its net asset value.

NOTES TO FINANCIAL STATEMENTS — (continued)

The following is a summary of the level inputs used, as of March 31,2023, involving the Funds' assets carried at fair value. The inputs used for valuing securities may not be an indication of the risk associated with investing in those securities.

There were no Level 3 securities in the Global, International Small Cap, U.S. Value and Core Plus Funds at the beginning or during the period presented.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value in the International Fund:

•	Balance As Of September 30, 2022	Realized Gain (Loss)	Change In Unrealized Appreciation (Depreciation)	Purchases	Sales	Transfers Into Level 3	Transfers Out Of Level 3	Balance As Of March 31, 2023
Preferred Stocks Russia Common Stocks	\$ 777,985	\$—	\$ (777,985)	\$—	\$	\$—	\$	\$—
Russia	317,960		(317,960)		_			
Total	\$1,095,945	\$	\$(1,095,945)	\$	\$	\$	\$	\$

The International fund held two level 3 securities with a fair value of \$0 as of March 31, 2023 that were valued using prices provided by the Fund's investment advisor.

	Fair Value at March 31, 2023	Valuation Techniques	Unobservable Inputs	Range (Weighted Average)
Preferred Stocks				
		Market	Market	
Russia	\$	Approach	DiscountRate	100%
Common Stocks				
		Market	Market	
Russia	_	Approach	DiscountRate	100%

The significant unobservable inputs that can be used in the fair value measurement are: Market Discount Rate. Significant decreases (increase) in Market Discount Rate would have resulted in a significantly higher (lower) fair value measurement.

NOTES TO FINANCIAL STATEMENTS — (continued)

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value in the Emerging Markets Fund:

	Balance As Of September 30, 2022	Realized Gain (Loss)	Change In Unrealized Appreciation (Depreciation)	Purchases	Sales	Transfers Into Level 3	Transfers Out Of Level 3	As Of March 31, 2023
Common Stocks								
Russia	\$4,843,557	\$	\$(4,843,557)	\$	\$	\$	\$	\$
Total	\$4,843,557	\$	\$(4,843,557)	\$	\$	\$	\$	\$

The Emerging Market fund held five level 3 securities with a fair value of \$0 as of March 31, 2023 that were valued using prices provided by the Fund's investment advisor.

	Fair Value at March 31, 2023	Valuation Techniques	Unobservable Inputs	Range (Weighted Average)
Common Stocks				
		Market	Market	
Russia	\$	Approach	DiscountRate	100%

The significant unobservable inputs that can be used in the fair value measurement are: Market Discount Rate. Significant decreases (increase) in Market Discount Rate would have resulted in a significantly higher (lower) fair value measurement.

	Balance As Of September 30, 2022	Realized Gain (Loss)	Change In Unrealized Appreciation (Depreciation)	Purchases	Sales	Transfers Into Level 3	Transfers Out Of Level 3	Balance As Of March 31, 2023
Common Stocks								
United States	\$16,917	\$	\$(2,917)	<u>\$</u> —	\$	\$	\$	\$14,500
Total	\$16,917	\$	\$(2,917)		\$	\$		\$14,500

The Small Cap Value Fund held one level 3 security with a fair value of \$14,500 as of March 31, 2023. The valuation technique used for this security was the last observable price and the unobservable input used was management's estimate of net liquidation value.

NOTE 3 – INVESTMENT ADVISORY FEE AND OTHER TRANSACTIONS WITH AFFILIATES

A. Advisor Fee. The Advisor provides the Funds with investment management services under an Investment Advisory Agreement. The Advisor furnishes all investment advice, office space and certain administrative services, and provides certain personnel, needed by the Funds. As compensation for its services, the Advisor is entitled to a monthly fee. The Advisor received a monthly fee at the annual rate of 0.75% of the first \$2.5 billion of average daily net assets, 0.70% on average daily net assets from \$2.5 billion to \$5.0 billion, and 0.67% of the average daily net assets greater than \$5.0 billion, of the International Fund. The Advisor received a monthly fee at the annual rate of 0.95% of the first \$2.5 billion of average daily net assets, 0.90% on average

NOTES TO FINANCIAL STATEMENTS — (continued)

daily net assets from \$2.5 billion to \$5.0 billion, and 0.85% of the amount of average daily net assets greater than \$5.0 billion, of the Emerging Markets Fund. The Advisor received a monthly fee at the annual rate of 0.95% of the first \$1.0 billion of average daily net assets, and 0.90% of the average daily net assets greater than \$1.0 billion, of the International Small Cap Fund. The Global Fund, Small Cap Value Fund, U.S. Value Fund, and Core Plus Fund incurred a monthly fee at the annual rate of 0.80%, 0.70%, 0.55%, and 0.35% based upon their average daily net assets, respectively. The Advisor has contractually agreed to limit the Management Fee of each share class of the Core Plus Fund to 0.30% pursuant to an Investment Advisory Fee Waiver Agreement in effect until January 28, 2024. For the six months ended March 31, 2023, the Core Plus fund had \$14,807 in advisory fees waived. These waived fees are not eligible for recoupment. For the six months ended March 31, 2023, the International Fund, the Global Fund, the Emerging Markets Fund, the International Small Cap Fund, the Small Cap Value Fund, the U.S. Value Fund and the Core Plus Fund incurred \$2,048,908, \$166,212, \$3,145,872, \$1,293,846, \$18,235, \$13,843, and \$103,649 in advisory fees, respectively.

Certain officers and trustees of the Trust are also officers of the Advisor and receive no compensation directly from the Funds for serving in their role.

The Funds are responsible for their own operating expenses. The Advisor contractually agreed to limit each Fund's annual operating expenses, including repayment of previous waivers, to the following percentages of the Fund's average daily net assets attributable to the specific classes through January 28, 2024 (the "Expense Cap Agreement"):

Fund	Class A	Class C	Class I	Class R6
International Fund	1.20%	1.95%	0.85%	0.75%
Global Fund	1.25%	2.00%	1.00%	0.82%*
Emerging Markets Fund	1.37%	2.12%	1.12%	0.97%
International Small Cap Fund	1.40%	2.15%	1.15%	1.00%
Small Cap Value Fund	1.15%	N/A	0.90%	0.72%
U.S. Value Fund	0.95%	N/A	0.70%	0.60%
Core Plus Fund	0.50%	N/A	0.30%	0.30%

^{*} This class is not active.

The Funds may incur additional expenses not covered under the Expense Cap Agreement. These expenses include acquired fund fees and expenses, taxes, interest, broker commissions, and proxy expenses or other extraordinary expenses.

Any reimbursements of fee waivers made by the Advisor to a Fund are subject to repayment by the Fund, to the extent that the Fund is able to make the repayment within the expense limit specified in its Expense Cap Agreement.

NOTES TO FINANCIAL STATEMENTS — (continued)

Under the Expense Cap Agreement that was in place during the period covered by this report, any such repayment must be made before the end of the thirty-six months after the month in which the related reimbursement or waiver occurred. The Trust has agreed to repay the expense reimbursement to the Advisor. However, the repayment of previously waived expenses is limited to amounts that do not cause the aggregate operating expenses of the Fund to exceed the current expense cap or the expense cap in place at the time the waiver was generated. For the six months ended March 31, 2023, the Advisor waived expenses and/or reimbursed the Funds \$222,370, \$44,896, \$91,270, \$17,332, \$55,508, \$68,850, and \$94,010 for the International Fund, Global Fund, Emerging Markets Fund, International Small Cap Fund, Small Cap Value Fund, U.S. Value Fund and Core Plus Fund, respectively. Repayment rights expire as follows:

Fund	Six Months Ended September 30, 2023	Year Ended September 30, 2024	Year Ended September 30, 2025	Six Months Ended March 31, 2026
International Fund	\$140,962	\$311,474	\$440,163	\$222,370
Global Fund	31,142	78,902	96,460	44,896
Emerging Markets Fund	123,287	56,334	141,383	91,270
International Small Cap Fund	1,855	8,859	25,090	17,332
Small Cap Value Fund	60,262	100,743	132,842	55,508
U.S. Value Fund	_	_	89,215	68,850
Core Plus Fund	53,946	216,372	211,363	94,010

The Advisor did not recoup any fees previously waived or reimbursed for the International Fund, Global Fund, Emerging Markets, International Small Cap Fund, Small Cap Value Fund, U.S. Value Fund and Core Plus Fund.

B. Administration Fee. The Northern Trust Company (the "Administrator") acts as administrator for the Funds. The Administrator prepares various federal and state regulatory filings; prepares reports and materials to be supplied to the Trustees; monitors the activities of the Funds' custodian, transfer agent and accountant; coordinates the preparation and payment of Fund expenses; and reviews the Funds' expense accruals. For these services, each Fund pays the administrator monthly a fee accrued daily and based on the Fund's average daily net assets. The Funds may also reimburse the Administrator for out-of-pocket expenses incurred by the Administrator in the performance of its duties. The amounts paid directly to the Administrator by the Funds for administrative services are included in the Administration fees in the Statements of Operations.

NOTES TO FINANCIAL STATEMENTS — (continued)

C. Distribution and Servicing Fees. ALPS Distributors, Inc. (the "Distributor"), a registered broker-dealer, acts as the Funds' principal underwriter in a continuous public offering of the Funds' shares. A portion of the Funds' distribution expenses is paid by the Advisor.

The Funds have adopted a Distribution Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act for the Funds' Class A and C shares. The Plan is designed to reimburse the Distributor or dealers for certain promotional and other sales related costs associated with sales of such Fund shares. Unreimbursed amounts may be carried forward and paid in a subsequent year, to the extent that total expenses under the Plan do not exceed 0.25% and 0.75% of the average daily net assets of each Fund's Class A and C shares, respectively. During the six months ended March 31, 2023, the Funds paid to the Distributor and each dealer a monthly fee at the annual rate of 0.25% of the average daily net assets of Class A shares and 0.75% of the average daily net assets of Class C shares beneficially owned by the Distributor's and each dealer's existing brokerage clients. The Plan may be continued in effect from year to year if such continuance is approved annually by the Board of Trustees of the Trust, including the vote of a majority of the Independent Trustees. For the six months ended March 31, 2023, the following Funds incurred expenses pursuant to the Plan:

Fund	Class A	Class C
International Fund	\$ 41,049	\$26,610
Global Fund	1,029	2,580
Emerging Markets Fund	167,159	20,237
International Small Cap Fund.	54,034	12,894
Small Cap Value Fund		N/A
U.S. Value Fund.	51	N/A
Core Plus Fund	971	N/A

The Funds have adopted a Shareholder Service Plan for Class C, and have authorized sub-transfer agency fee payments for Class I, to pay to securities broker-dealers, retirement plan sponsors and administrators, banks and their affiliates, and other institutions and service professionals, as shareholder servicing agents of the Funds, an annual fee for non-distribution sub-transfer agent and/or subaccounting services up to 0.25% and 0.05% of annual net assets attributable to Class C and Class I, respectively (the "Service Fees"). For the six months ended March 31, 2023, the Funds incurred the following Service Fees:

NOTES TO FINANCIAL STATEMENTS — (continued)

Fund	Class C	Class I
International Fund	\$8,870	\$95,982
Global Fund	860	6,829
Emerging Markets Fund	6,746	97,748

NOTES TO FINANCIAL STATEMENTS — (continued)

NOTE 6 – FEDERAL INCOME TAX MATTERS

The Funds may be subject to taxes imposed by countries in which they invest. Such taxes are generally based on income and/or capital gains earned. Taxes are accrued based on net investment income, net realized gains and net unrealized appreciation as such income and/or gains are recorded. Taxes accrued on unrealized gains are reflected as a liability on the Statements of Assets and Liabilities under the caption "Foreign capital gains taxes". When assets subject to capital gains tax are sold, accrued taxes are relieved, and the actual amount of the taxes paid is reflected on the Statements of Operations as a reduction in "Net realized gain (loss) on Investments".

GAAP requires that certain components of net assets be reclassified between financial and tax reporting. Temporary differences do not require reclassification. Temporary and permanent differences have no effect on net assets or net asset value per share. For the year ended September 30, 2022, the Funds made the following permanent book-to-tax reclassifications primarily related to the treatment of foreign currency transactions, passive foreign investment companies, paydowns, corporate actions, distributions treated as return of capital and difference between book and tax accretion methods for market premium:

	Undistributed Net Investment Income/(Loss)	Accumulated Net Realized Gain/(Loss)	Paid-In Capital
International Fund	\$ (14,731)	\$ 14,731	\$ —
Global Fund	(56,080)	56,080	_
Emerging Markets Fund	(586,504)	1,205,684	(619,180)
International Small Cap Fund	2,753,348	(2,753,348)	_
Small Cap Value Fund	24,602	(24,602)	_
U.S. Value Fund	(14)	14	_
Core Plus Fund	17,522	(17,522)	_

As of September 30, 2022, the components of distributable earnings on a tax basis were as follows:

	International Fund	Global Fund
Cost of investments for tax purposes	\$ 659,725,467	\$38,336,993
Gross tax unrealized appreciation. Gross tax unrealized depreciation.	9,774,366 (211,075,795)	5,252,036 (6,945,117)
Net unrealized appreciation (depreciation) on investments and foreign currency.	(201,301,429)	(1,693,081)
Distributable ordinary income		570,731
Total distributable earnings		570,731
Other accumulated gains/(losses)	(79,729,891)	(92,585)
Total accumulated earnings	\$(281,031,320)	$\underbrace{\$(1,\!214,\!935})$

NOTES TO FINANCIAL STATEMENTS — (continued)

currency	(322, 515, 160)	(112,090,550)	(936,364)	(1,071,318)	(6,813,194)
incomeDistributable long-term	_	_	48,638	32,455	24,181
capital gains				14	
Total distributable earnings	_		48,638	32,469	24,181
Other accumulated gains/(losses)	(266,104,484)	(138,792,887)	(53,004)		(2,233,468)
Total accumulated earnings	\$(588,619,644)	<u>\$(250,883,437)</u>	\$ (940,730)	<u>\$(1,038,849)</u>	<u>\$ (9,022,481)</u>

The differences between book and tax basis distributable earnings are primarily related to foreign currency adjustments and the differences in classification of paydown gains and losses for tax purposes compared to book purposes. These differences are permanent.

The tax composition of dividends for the years ended September 30, 2022 and September 30, 2021 for the Funds, were as follows:

	Ordinary	y Income	Long Te Capital G	Retu	Capital		
	2022	2021	2022	2021	20	22	2021
International Fund	\$26,061,162	\$17,261,308	\$	\$	\$	_	\$

Core Plus Fund	1,785,392	2,168,060	_	_		_	_

NOTES TO FINANCIAL STATEMENTS — (continued)

For the period subsequent to October 31, 2021, through the fiscal year ended September 30, 2022, The International Fund, Global Fund, Emerging Markets Fund, International Small Cap Fund and Small Cap Value Fund incurred \$734,820, \$90,206, \$3,467,236, \$127,405 and \$49,663 respectively, of net capital losses and/or late year ordinary losses for which the Funds intend to treat as having occurred in the following fiscal year.

At September 30, 2022 the Funds had capital loss carryforwards and capital loss carryforwards utilized as indicated below:

	Indefinite	Utilized
International Fund	\$ (78,995,071)	\$
Global Fund	_	_
Emerging Markets Fund	(262,586,548)	_
International Small Cap Fund	(138,647,931)	(6,908,509)
Small Cap Value Fund.	_	_
U.S. Value Fund	_	_
Core Plus Fund	(2,233,468)	_

NOTE 7 - OFFERING PRICE PER SHARE

The public offering price for Class A shares is the net asset value per share plus a sales charge, which varies in accordance with the amount of the purchase up to a maximum of 5.75% for the International, Global, Emerging Markets, International Small Cap, Small Cap Value, and U.S. Value Funds, and 3.75% for the Core Plus Fund. A contingent deferred sales charge ("CDSC") of 1.00% will be deducted with respect to Class A shares purchased without a sales load and redeemed within 12 months of purchase, unless waived, as discussed in the Prospectus. Any applicable CDSC will be 1.00% of the lesser of the original purchase price or the redemption value of the Class A shares redeemed. Class C shares include a 1.00% CDSC paid by redeeming shareholders within 12 months of purchase. As a result the redemption price may differ from the net asset value per share. The public offering prices for I shares are the respective net asset values. Sales charges are not an expense of the Funds and are not reflected in the financial statements of the Funds.

NOTES TO FINANCIAL STATEMENTS — (continued)

NOTE 8 – TRANSACTIONS WITH AFFILIATES

The following issuers were affiliated with the International Small Cap Fund as defined in Section (2)(a)(3) of the 1940 Act, as these Funds held 5% or more of the outstanding voting securities of the following issuers during the six months from October 1, 2022 through March 31, 2023:

International Small Cap Fund

Issuer Name	Value At September 30, 2022	Sales Proceeds	Realized Gain/(Loss)	Unrealized Appreciation/ (Depreciation)	Value At March 31, 2023	Dividend Income
Desarrolladora Homex SAB de CV Urbi Desarrollos Urbanos SAB	\$388,592	\$ \$	\$	\$(78,379)	\$310,213	\$

Shares		47,014	10	2,172,252		
% of Total Outstanding Shares		9.54%	100.00%	29.41%		

NOTE 10 - RISK FACTORS

Significant market disruptions, such as those caused by pandemics (e.g. Covid-19 pandemic), war (e.g. Russia's invasion of Ukraine), natural disasters, acts of terrorism, or other events, may adversely impact global economic and market activity, and contribute to significant volatility in financial markets. Any such disruptions could have an adverse impact on the prices and liquidity of the Funds' investments.

NOTE 11 – SUBSEQUENT EVENTS

In preparing these financial statements, the Trust has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were available to be issued. The Trust has concluded that there are no subsequent events to note.

ADDITIONAL INFORMATION — (Unaudited)

BOARD CONSIDERATIONS AND CONTINUATION OF INVESTMENT ADVISORY AGREEMENT

In November, 2022, the Board of Trustees of Brandes Investment Trust (the "Trust"), including the independent Trustees, unanimously approved renewal of the Investment Advisory Agreement (the "Agreement") between the Trust and Brandes Investment Partners, L.P. (the "Advisor") for an additional one-year term with respect to the following series of the Trust (each, a "Fund"): Brandes Emerging Markets Value Fund, Brandes International Equity Fund, Brandes International Small Cap Equity Fund, Brandes Global Equity Fund, Brandes Small Cap Value Fund, Brandes U.S. Value Fund and Brandes Core Plus Fixed Income Fund.

Information Reviewed

During the course of each year, the Board receives and reviews a wide variety of materials relating to the nature, quality and extent of the services provided by the Advisor to the Funds, including reports on each Fund's investment results, portfolio composition, portfolio trading practices, and other matters. In addition, in connection with the Board's annual review of the Agreement, the Trustees requested and reviewed supplementary information from the Advisor that included materials and analysis about the Funds' investment results and advisory fees; information about the services provided by the Advisor to the Funds, such as compliance monitoring and portfolio trading practices, and the risks assumed by the Advisor in connection with those services; information about the services provided and the fees charged by the Advisor to its institutional and other clients employing similar strategies, including comparisons of those services and fees to the services and fees for the Funds; financial and profitability information regarding the Advisor and its relationship with the Funds; and information about the Advisor's investment and other personnel providing services to the Funds, as well as the Advisor's practices to evaluate and compensate its investment personnel. The Trustees also obtained and reviewed information from FUSE Research Network LLC, an independent third-party data provider, comparing the Funds' investment results and fees and expenses to those of peer groups and categories of funds identified by FUSE as similar to the Funds.

In connection with the Board's reviews, the Trustees received assistance and advice regarding legal and industry standards from counsel to the Trust and the independent Trustees. The Board discussed the approval of the Agreement with respect to each Fund with representatives of the Advisor at two Board meetings, and the independent Trustees discussed the Agreement in multiple private sessions with counsel at which no representatives of the Advisor were present. In deciding to approve the Agreement with respect to each Fund, the Board and the independent Trustees did not identify any single or particular piece of information that, in isolation, was the controlling factor, and each Trustee may have attributed different weight to each factor considered. This summary describes the most important, but not all, of the factors considered by the Board and the independent Trustees.

ADDITIONAL INFORMATION — (Unaudited) (continued)

Nature, Quality and Extent of Services

The Trustees considered the overall nature, quality and extent of services provided by the Advisor to the Funds. They considered, among other things, the quality and depth of the Advisor's investment, compliance and other personnel, the Advisor's regulatory compliance resources and program, the Advisor's business continuity and cybersecurity programs, and the day-to-day administrative services provided to the Funds.

With respect to the Funds' investment results, the Trustees reviewed and considered detailed information provided by FUSE, which utilized Morningstar data, comparing each Fund's investment results to those of a peer group of similarly managed funds selected by FUSE, a larger group of funds selected by FUSE in the same investment classification as the subject fund, and the Fund's benchmark index. The Trustees also met with representatives of FUSE and discussed with them the methodology used by FUSE in determining the Funds' peer groups and universes. The FUSE report included confirmation that FUSE had selected peer group and universe funds for comparison to the Funds independently of the Advisor. The Trustees noted that while the FUSE information covered both peer group and universe funds, the Trustees focused more on the peer group information because the peer group funds were more directly comparable to the Funds.

The Trustees considered that for the one-, three-, five- and ten-year periods ended September 30, 2022, as applicable, and since inception, the investment results of the Class I shares of the Funds were mixed compared to the funds in their respective peer groups, as well as compared to their respective benchmarks. The Trustees noted that the investment performance of the other share classes would differ, and generally be lower, as a result of the higher expenses paid by those share classes. The meeting materials indicated as follows with respect to the annualized returns of each Fund compared to the median of its peer group and its benchmark:

- Emerging Markets Value: below median for the one-, three-, five- and ten-year periods and since inception; and outperformed the benchmark for the period since inception;
- International Equity: above median for the ten-year period and since inception, at median for the five-year period, and below median for the one- and three-year periods, and outperformed the benchmark for the period since inception;
- International Small Cap Equity: at median for the three-year period, below median for all other periods, and outperformed the benchmark for the one- and three-year periods;
- Global Equity: below median for the one-, three-, five- and ten-year periods and since inception, and outperformed the benchmark for the one-year period;

ADDITIONAL INFORMATION — (Unaudited) (continued)

- \bullet U.S. Value: below median and outperformed the benchmark for the period since inception;
- Small Cap Value: above median for the three-year period and since inception, below the median for the one-year period, and outperformed the benchmark for all periods; and
- Core Plus Fixed Income: above median for the one-, three- and ten-year periods, below median for the five-year period and since inception, and outperformed the benchmark for all periods.

The Trustees considered, among other things, that the U.S. Value Fund has a short operating history as a registered investment company; that the Global Equity, Small Cap Value and U.S. Value Funds have very small assets; and that one or more Funds from time to time may hold significant cash positions, and that these positions may impact investment performance.

In evaluating the Funds' performance, the Trustees generally considered long-term performance to be more important than short-term performance but noted that short-term performance may be helpful in showing an improving trend. The Trustees noted the Advisor's continued commitment to the Graham and Dodd value strategy of investment management and its lack of style drift compared to other value managers; considered that it is not unusual for the performance of funds managed with such a long-term strategy to fall below performance measurement indices for some periods; and noted the Advisor's observations regarding the market environment in recent years, including the extended period that the value strategy has been out of favor in the market, and that the Advisor's strategies generally have performed well when value is performing well in the market. They also noted that the Funds' investment approach is fully described in the prospectus, enabling the Funds' shareholders to decide if they are willing to accept the long-term outlook associated with the Advisor's investment approach.

Based on these reviews, the Trustees determined that under all of the circumstances the nature and quality of the services provided by the Advisor were sufficient for renewal of the Funds' investment advisory agreement.

Advisory Fees, Total Expenses, Profitability and Ancillary Benefits

With respect to advisory fees, the Trustees considered the following:

- The Funds' contractual advisory fees are at or below the median advisory fees of the funds in their respective peer groups with the exception of the Global Equity Fund (where the advisory fee is five basis points above the median).
- The advisory fees charged by the Advisor to comparable institutional and other accounts. The Trustees considered that these fees generally are lower than the fees charged the Funds, and noted the information provided by the Advisor regarding the

ADDITIONAL INFORMATION — (Unaudited) (continued)

additional risks, responsibilities and expenses that the Advisor incurs in sponsoring and operating the Funds.

With respect to the total expenses of the Funds, the Trustees considered the following:

- Total expenses represent the amount actually paid by Fund shareholders.
- All of the Funds are subject to expense caps.
- The Funds' actual total expenses are at or below the median total expenses of the funds in their respective peer groups with the exception of the Emerging Markets, International Small Cap Equity and Global Equity Funds (where the actual total expenses are three, seven and seven basis points above the median, respectively).

The Trustees determined that the Funds' advisory fees and total expense levels were fair and reasonable.

The Trustees considered that in the past the Advisor had agreed to add breakpoints to the fee schedules for Funds where appropriate. They considered that although the fee schedules for a number of the other Funds did not yet have breakpoints, it was premature to discuss economies of scale for those Funds when the Advisor is still subsidizing the Funds' expenses, and that the matter could be discussed in the future as the Funds' assets increase. The Trustees concluded that there was a reasonable sharing of any efficiencies or economies of scale at this time.

The Trustees reviewed and considered information about the Advisor's financial capability to continue to provide services to the Funds, as well as an analysis of the profitability to the Advisor of its relationship with the Funds. The Trustees considered information regarding the ancillary benefits to the Advisor from its relationship with the Funds, which primarily related to the benefits of proprietary and third-party research provided by broker-dealers executing portfolio transactions on behalf of the Funds. The Trustees concluded that the Advisor's profitability from its relationship with the Funds is not excessive and that any ancillary benefits received are reasonable under the circumstances.

Conclusions

Based on their review, including consideration of the factors identified above, the Board and the independent Trustees concluded in the exercise of their reasonable business judgment that the advisory fees contemplated by the Agreement are fair and reasonable to each Fund and its shareholders, and that renewal of the Agreement is in the best interests of each Fund and its shareholders.

PROXY VOTING PROCEDURES

The Advisor votes proxies relating to the Funds' portfolio securities in accordance with procedures adopted by the Advisor. You may obtain a description of these

ADDITIONAL INFORMATION — (Unaudited) (continued)

procedures, free of charge, by calling toll-free 1-800-331-2979. This information is also available through the Commission's website at http://www.sec.gov.

Information regarding how the Trust voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge, upon request, by calling 1-800-331-2979. This information is also available through the Commission's website at http://www.sec.gov.

PORTFOLIO HOLDINGS DISCLOSURE

The Trust files the Funds' complete schedules of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-PORT. The Trust's Form N-PORT filings are available on the Commission's website at http://www.sec.gov. Information regarding the Trust's Form N-PORT filings is also available, without charge, by calling toll-free, 1-800-331-2979.

TRUSTEES AND OFFICERS INFORMATION — (Unaudited)

The Board is responsible for the overall management of the Trust's business. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Advisor, Administrator, the Trust's Custodian, Distributor and Transfer Agent. The Board delegates the day-to-day operations of the Trust to its officers, subject to each Fund's investment objective and policies and to general supervision by the Board. The Trust's Statement of Additional Information includes additional information about the Trustees and is available, without charge, by calling 1-800-331-2979 or visiting www.brandes.com.

The Trustees and officers of the Trust, their business addresses and principal occupations during the past five years are:

PRIVACY NOTICE

Brandes Investment Trust and Brandes Investment Partners, L.P. may collect non-public information about you from the following sources:

- Information we receive about you on applications or other forms;
- Information you give us orally; and
- Information about your transactions with us.

We do not disclose any non-public personal information about any shareholder or former shareholder of the Fund without the shareholder's authorization, except as required by law or in response to inquiries from governmental authorities. We restrict access to your personal and account information to those employees who need to know that information to provide products and services to you. We also may disclose that information to unaffiliated third parties (such as to brokers or custodians) only as permitted by law and only as needed for us to provide agreed services to you. We maintain physical, electronic and procedural safeguards to guard your non-public personal information.

If you hold shares of the Fund through a financial intermediary, such as a broker-dealer, bank, or trust company, the privacy policy of your financial intermediary governs how your non-public personal information would be shared with nonaffiliated third parties.
