Management’s Discussion of Fund Performance - BIEAX - A - Share

Summary of Results

The net asset value of the Brandes International Equity Fund (Class A Shares without Load) advanced 29.73% in the trailing twelve months ended September 30, 2024, outperforming the 24.77% return of the MSCI EAFE Index, as well as outperforming the 23.14% return of the MSCI EAFE Value Index. Notable contributors included holdings in the United Kingdom, Germany, and Brazil. Meanwhile, allocations to France and Mexico weighed on relative returns, as did several holdings in Japan. From a sector standpoint, holdings in industrials, consumer staples, and financials were standout performers, along with holdings in information technology. Conversely, overweight to energy detracted from relative returns, as did allocations to real estate and consumer discretionary.

TOP PERFORMANCE CONTRIBUTORS

Aerospace & Defense | Embraer (Brazil) and Rolls-Royce (United Kingdom). Both Embraer and Rolls-Royce reported improving earnings amid continued strong demand in their aerospace end markets.

Banks | Intesa Sanpaolo (Italy), Barclays (United Kingdom), and Erste Group Bank (Austria).

Information Technology | SAP (Germany) and Taiwan Semiconductor Manufacturing Company (TSMC). TSMC appreciated as the proliferation of artificial intelligence (AI) applications fueled rising demand for semiconductor content.

TOP PERFORMANCE DETRACTORS

Mexico | Fibra Uno (real estate), America Movil (communication services), and Cemex (materials). Mexican stocks tumbled as the presidential election results raised concerns about the potential for less market-friendly policies by the new government. However, we maintain confidence in our Mexican holdings as we believe they are well managed, with low susceptibility to government intervention and long histories navigating turbulent times.

Consumer Discretionary | Kering (France) and Swatch Group (Switzerland). Luxury goods players, including Kering and Swatch, have been struggling with slower-than-expected demand recovery in Asia, especially China, which represents one of the largest luxury goods markets in the world.

Overweight to Energy | Amid declining oil prices, energy was the worst-performing sectors in the benchmark. As such, our overweight hurt relative returns.

Fund Performance

The following graph and chart compare the initial and subsequent account values at the end of each of the most recently completed 10 fiscal years of Class A Shares of the Fund. It assumes a \$10,000 initial investment at the beginning of the first fiscal year in an appropriate, broad-based securities market index for the same period.

GROWTH OF \$10,000

AVERAGE ANNUAL TOTAL RETURNS	1 Year	5 Year	10 Year
