

Brandes U.S. Value Fund

A sub-fund of Brandes Investment Funds Plc

FUND OBJECTIVE

Long-term capital appreciation by investing in equity and equity related securities of U.S. issuers whose equity market capitalizations exceed \$5 billion at the time of purchase.

The Brandes U.S. Value Fund (the “Fund”) Class I USD rose 7.14% in the quarter, underperforming its index, the Russell 1000 Value Index, which was up 9.26%.

Positive Contributors

Leading contributors included holdings in the consumer staples and consumer discretionary sectors.

Flooring manufacturer Mohawk announced earnings higher than consensus expectations and benefited from the anticipation of greater home improvement activity that could result from the decrease in interest rates. Ingredion, a specialty ingredients company, and Kenvue, a personal care company, also announced improved earnings and outperformed the overall market (Russell 1000 Index).

Other standout performers included hospital operator HCA Healthcare and payment services company Fiserv.

Performance Detractors

Driven by declining oil prices, energy was the worst-performing sector in the index, and two of our energy holdings, namely Chevron and Halliburton, were among the most significant detractors for the Fund.

Besides energy, the technology sector and technology-related stocks also delivered relatively weak performance as AI-associated companies gave back some of their solid gains from the first half of the year. While we do not have exposure to some of the most prominent (and therefore more likely to be expensive) AI-related names, we do have a slight overweight to technology companies relative to the Russell 1000 Value Index.

At the stock level, our position in Alphabet hurt returns, along with semiconductor holdings Micron and Qorvo. While the broader semiconductor industry declined due to concerns that the AI buildout may be exceeding its ability to be efficiently monetised, Micron and Qorvo were particularly affected by the weakness in smartphone and PC end-demand. We had trimmed our position in Micron late last quarter after it had been a year-to-date outperformer relative to the broad Russell 1000 Index, but then we repurchased some shares after the stock declined by over 30% in the third quarter. Micron’s share price rose toward the end of the quarter following better-than-expected earnings and an upward revision of its full-year forecast, although this increase did not fully offset the earlier decline. Nevertheless, both Micron and Qorvo continue to offer appealing value potential to us, trading at discounted valuations compared to some of the more obvious AI beneficiaries.

Other detractors included global logistics company FedEx, pharmaceutical distributor McKesson, and pharmaceutical firm Merck. Weak industry-wide vaccine sales in China hurt Merck’s prospects, but we see the share-price decline as temporary and believe Merck remains an attractive opportunity given its cancer immunotherapy and vaccine franchises, as well as its attractive drug development pipeline.

Furthermore, our underweights to utilities and real estate detracted from relative returns as they were the two best-performing sectors in the index, due partly to market anticipation that they stand to benefit from further interest-rate reductions.

MORNINGSTAR STYLE BOX™

The Morningstar Style Box™ reveals a fund’s investment strategy by showing its investment style and market capitalization based on the fund’s portfolio holdings.

Select Activity in the Quarter

We initiated positions in global auto parts distributor LKQ and energy services firm Schlumberger.

LKQ is the largest collision repair parts distributor in North America, with operations extending across Europe. The company also sells aftermarket accessories for RVs and light trucks, and resells metals extracted from scrap cars.

High scrap metal prices post-COVID initially resulted in a business boom and improved margins for LKQ. However, over the past year, LKQ's shares have underperformed the overall U.S. market (Russell 1000 Index) as its North American business (major profit driver) has been adversely impacted by a reduction in auto collision volumes and a rise in total write-offs compared to auto repairs following collisions. These industry-wide challenges led the company to lower its earnings guidance for 2024.

Nonetheless, we believe LKQ represents a compelling investment opportunity. The current downturn has prompted the company to focus more on returning value to shareholders through dividends and share buybacks, rather than on potentially overpriced acquisitions. LKQ also maintains a competitive position as it has been experiencing smaller revenue and volume declines than the overall industry, suggesting that it is either gaining market share or seeing improvements in pricing. Additionally, we appreciate that the company has historically generated positive free cash flows and that there is potential upside if it successfully manages the integration of its European operations, which are currently undergoing a restructuring following several acquisitions aimed at building scale. Finally, the cyclically depressed auto repair market may normalise, providing a potential tailwind for LKQ. Trading at just over 10x earnings, the company not only offers an attractive margin of safety (the discount of market price to our estimate of intrinsic value) but also enhances the diversification of the Fund, in our opinion.

In addition to the new purchases, other major portfolio activity included the full sales of health care contract research organisation Fortrea and media company Fox.

After its spin-off from Labcorp last year, we maintained a position in Fortrea, viewing it as an undervalued opportunity amid a challenging industry environment. Fortrea specialises in clinical studies for biotechnology and pharmaceutical companies, and the biotechnology industry faced a weakened funding environment in 2022/2023 due to rising interest rates. Additionally, Fortrea's smaller market capitalisation relative to Labcorp's likely led to technical selling pressure from shareholders that had positions in the larger Labcorp but opted not to hold the smaller-cap Fortrea.

While we continue to believe that the contract research industry will grow over the long term, we decided to divest our investment in Fortrea due to the difficulties the company has encountered since becoming an independent entity. Fortrea has struggled to improve profitability given its weaker competitive position relative to some of the larger players in the industry, as well as its increased financial leverage. As the risk/reward trade-off for Fortrea shifted unfavourably, we believed it was prudent to redeploy the capital into what we considered more attractive value opportunities.

Year-to-Date Briefing

The Fund rose 15.58% in the nine months ended 30 September 2024, underperforming its index, the Russell 1000 Value Index, which increased 16.12%.

During the period, value stocks underperformed the overall market (Russell 1000 Value Index vs. Russell 1000 Index) as the solid performance of large technology companies such as Nvidia and Meta Platforms benefited the broader index.

For the Fund, holdings in financials, consumer, and technology helped performance, led by technology holdings Micron Technology and Flex, financials holdings Fiserv and Bank of New York Mellon, as well as flooring company Mohawk Industries. Hospital operator HCA Healthcare was also a standout performer.

As was the case for the quarter, our underweight to utilities hurt relative performance as it was the best-performing sector in the Russell 1000 Value Index. At the holding level, notable detractors included health care holdings Fortrea, CVS, and Merck, as well as energy holdings Halliburton and Chevron.

Current Positioning

The Fund continues to hold its key positions in the economically sensitive financials sector and the more defensive health care sector, while maintaining underweights in utilities and real estate. We also remain underweight in consumer staples and industrials, although the gaps have narrowed as we have identified more value opportunities in these sectors over the past few quarters. In contrast, we have pared some of our holdings in the health care, financials, and technology sectors, even though they remain areas of overweight for the Fund.

Following the outperformance of growth stocks (Russell 1000 Growth vs. Russell 1000 Value) this year, value stocks are now trading near the largest discount relative to growth stocks since the inception of the style indices. This valuation disparity is evident across various metrics, such as price/earnings, price/cash flow, and enterprise

value/sales. Historically, such valuation differentials have often signalled attractive future returns for value stocks over longer-term horizons. This is encouraging for us, as the Fund, guided by our value philosophy and process, has had the tendency to outperform the index when value stocks outperformed the Russell 1000 Index.

With only a relatively small number of companies—mostly tech-related—driving the broader market's performance, equity concentration levels have increased materially in popular indices. For example, the five largest companies account for over 25% of the weight in many U.S. indices, including the MSCI USA Index. In our view, this highlights the potential diversification benefits of having a value strategy to complement many investors' increasingly concentrated and technology-centred exposure, as the largest companies in the MSCI USA Index also represent the largest weights in various MSCI factor indices—with the MSCI USA Value Index being an exception.

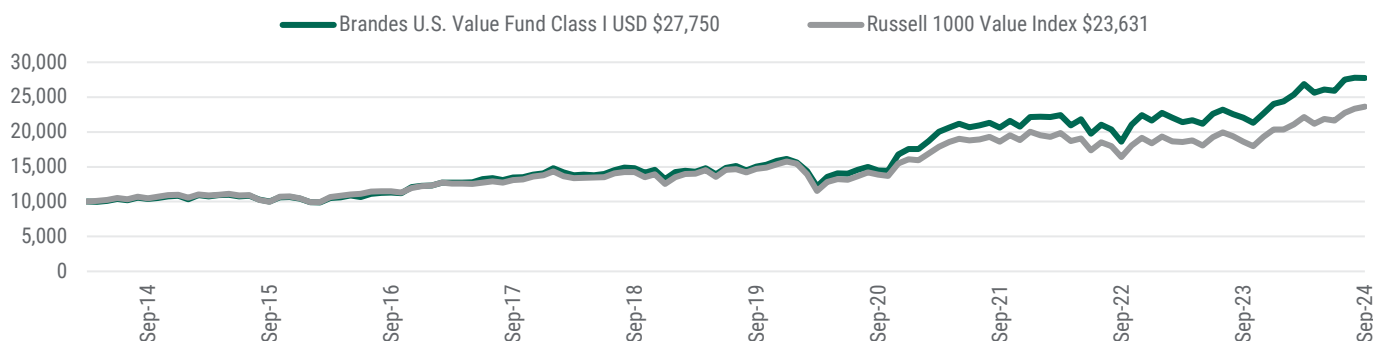

Looking ahead, we remain confident that the current fundamentals of our holdings bode well for the long term, and we are excited about the Fund's prospects.

The Russell 1000 Growth Index with gross dividends measures performance of the large cap growth segment of the U.S. equity universe. Securities are categorized as growth or value based on their relative book-to-price ratios, historical sales growth, and expected earnings growth. The MSCI USA Index measures the performance of the large and mid cap segments of the U.S. equity market. The MSCI USA Value Index captures large and mid cap U.S. securities exhibiting overall value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield. MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

This document is an advertisement for marketing purposes. Before subscribing, please read the prospectus and the key information document for packaged retail and insurance-based investment products (the "PRIIPs KID") or, for UK investors, the key investor information document (the "UCITS KIID").

This report is produced by the manager for marketing purposes only and does not constitute an offer or solicitation to subscribe for shares in Brandes Investment Funds plc (the "Company"). For more information on the risks associated with the Fund, please refer to the section entitled Risk Factors in the main body of the prospectus and the Fund's supplement to the prospectus. Full details regarding the Fund are set out in the key information document for packaged retail and insurance-based investment products (the "PRIIPs KID") or, for UK investors, the key investor information document (the "UCITS KIID"), the prospectus, the articles of association and the latest financial reports published for the Company (collectively the "Fund Documents"). Before any subscription, it is recommended that you read carefully the Fund Documents. The information provided in this material should not be considered an investment advice within the meaning of the MiFID II Directive. Income may fluctuate in accordance with market conditions and taxation arrangements. Investment in the Fund described in this report carries a substantial degree of risk and places your capital at risk. The price and value of investments can go down as well as up. Your investment may be subject to a redemption fee. You may not get back the original amount invested and you may lose all of your investment. Strategies discussed are subject to change at any time by the manager in its discretion due to market conditions or opportunities. The foregoing reflects the thoughts and opinions of Brandes Investment Partners® exclusively and is subject to change without notice.

The Fund Documents may be obtained without cost by contacting the Administrator for the Fund, your Financial Representative, or at the offices of the paying agent or representative in each jurisdiction. Austria, Belgium, France, Germany, Luxembourg, Netherlands, and the United Kingdom: FE fundinfo (Luxembourg) S.à.r.l., 6 Boulevard des Lumières, Belvaux, 4369 Luxembourg.
