

Brandes Global Value Fund

A sub-fund of Brandes Investment Funds Plc

FUND OBJECTIVE

Long-term capital appreciation by investing primarily in global equity securities of issuers listed or traded on Recognised Exchanges whose equity market capitalizations exceed \$5 billion at the time of purchase.

FUND INFORMATION

Total Net Asset Value (mil.)	\$124.2
Legal Structure	UCITS
Manager	Brandes Investment Partners (Europe) Limited
Trade Frequency	Daily
Dealing Cutoff	16:00 New York Time
Registered	AT, CH, DE, ES, FR, IE, LUX, NL, UK
Management Fee	0.70%
SFDR Classification	Article 8

The Brandes Global Value Fund (the “Fund”) Class I USD rose 9.50%, outperforming its benchmark, the MSCI World Index, which gained 8.88% in the quarter, and the MSCI World Value Index, which increased 7.49%.

Positive Contributors

The Fund's outperformance was primarily attributed to stock selection across various sectors, with notable contributions from industrials and materials. Aerospace and defence companies Rolls-Royce and Embraer, as well as pharmaceutical firm GSK, stood out as leading contributors.

Both Rolls-Royce and Embraer continued to benefit from recoveries in their commercial aerospace end-markets, resulting in improved cash-flow generation and stronger balance sheets. This positive development has mitigated the downside risks associated with the investments, while amplifying their upside potential. Consequently, we revised our intrinsic value estimates for these companies upward and believe they continue to offer attractive margins of safety at current valuation levels. The margin of safety for any security is the discount of market price to our estimate of intrinsic value.

Our technology holdings, particularly semiconductor-related firms such as Taiwan Semiconductor and U.S.-based Micron Technology, also delivered solid performance. This was fuelled by the improving semiconductor market and rising demand for semiconductor content, driven at least partially by the proliferation of Artificial Intelligence (AI) applications. German software company SAP also experienced a rise in its share price.

U.S. money centre banks Citigroup and Wells Fargo sustained their positive momentum from the fourth quarter, contributing further to the Fund’s outperformance.

Performance Detractors

Among our holdings, detractors included Spain-based Grifols, as well as several emerging markets holdings, such as Alibaba, Ambev, Topsports International Holdings, and Kasikornbank.

Biotechnology firm Grifols grappled with multiple declines in its share price following a short seller’s report that questioned the company’s accounting and corporate governance practices. In our opinion, the risks highlighted in the report had been largely known, and we maintained our modest-sized position in the company despite the volatility—albeit now at a lower weighting due to the share-price decline. While we have long been concerned with the company’s balance sheet, there is a potential near-term catalyst for its improvement as Grifols is expected to complete the sale of its ownership stake in Shanghai RAAS in the first half of this year and use the proceeds to pay down a significant portion of its debt.

We continue to believe there is potentially meaningful upside in the stock. Grifols’ plasma business weathered considerable challenges amid the COVID-19 pandemic, including decreased blood donations and higher costs associated with compensating donors. The company had also made substantial investments to expand capacity for future growth, which further weighed on its profitability. While the recovery has been slower than anticipated, assuming the Shanghai RAAS transaction concludes as expected, Grifols appears attractively valued to us, trading at a single-digit multiple of pre-COVID earnings. Additionally, we appreciate Grifols’ competitive position in a consolidated industry with appealing long-term potential growth.

MORNINGSTAR STYLE BOX™

The Morningstar Style Box™ reveals a fund's investment strategy by showing its investment style and market capitalization based on the fund's portfolio holdings.

Relative to the MSCI World Index, our underweight to technology companies also detracted from performance, given the notable appreciation of a few companies in the sector within the benchmark.

Select Activity in the Quarter

We initiated a new position in Canadian aerospace and defence company CAE, while divesting our holding in semiconductor equipment firm Applied Materials.

CAE supplies simulation equipment and integrated pilot training services to both civil aviation and military customers. Competing in a market dominated by two key players (the other being Flight Safety), CAE boasts the world's largest installed base of full-flight simulators. Over the past 20 years, CAE has diversified into the less cyclical pilot training business, offering training services through a global network of over 250 civil aviation and military training locations across 40 countries. The company derives 40% of its revenues from simulation products and 60% from training and services.

Our coverage of CAE began in 2011, and since then, our assessment of the company's core franchise quality remains unchanged. It is notable that during the COVID-19 pandemic, CAE took significant steps to strengthen its competitive position and improve industry structure. Firstly, the company leveraged its financial strength to complete a series of opportunistic acquisitions, purchasing nine companies at what we deemed attractive prices. This has helped CAE consolidate end-markets and expand its capabilities. Secondly, it restructured its cost base, closing nine plants and removing \$70 million in annualised costs that resulted in a 1.5% margin benefit on sales. Lastly, CAE expanded its relationship with mainline airlines, which chose to outsource an increasing share of their internal training needs. To satisfy this new demand, CAE embarked on a heavy capital expenditure cycle over the course of the pandemic that we believe will benefit shareholders in the years ahead.

The opportunity to initiate a position in CAE came as investors have been concerned about recent margin weakness within the company's defence segment. However, we view these challenges as temporary. Inflation and supply chain pressures have started to ease. Many of CAE's under-earning, fixed-price contracts are set to expire by 2025. We expect that CAE is positioned to improve its profitability as legacy fixed priced contracts roll over and as new high-margin defence contracts begin to ramp up. The company has given guidance for mid-double-digit margins on new contracts versus mid-single digit on legacy fixed-price contracts that were impacted by pandemic-related cost pressures.

CAE's investment case is supported by its dominant position within flight simulation and pilot training services that offer moat-like characteristics, strong free cash flow and high tangible returns on capital with favourable medium-term growth characteristics. The company also has access to attractive financing in the form of perpetual, zero-cost loans from the Canadian government for research and development initiatives.

We initially bought Applied Materials, the world's largest supplier of wafer fabrication equipment for semiconductor production when its shares declined in 2022 due to concerns about industry-wide semiconductor capital expenditures (capex). Although near-term earnings expectations were undermined by the cyclical downturn, we believed Applied Materials was well-positioned to capitalise on increased silicon intensity over the medium-term. Driven by rising need for DRAM and NAND memory, as well as the expanding use case for semiconductors across a variety of end-markets, we foresaw a potential uptick in demand for production equipment from companies like Applied Materials. Looking beyond short-term fluctuations, we anticipated that greater long-term semiconductor capex spending would be necessary to drive bit growth if the underlying requirement for memory chips and other semiconductors remained robust. With Applied Materials' stock price dipping below its historical trading multiples, we saw an attractive long-term risk/reward trade-off.

The market has increasingly favoured semiconductor-related companies because of rising demand driven primarily by AI. We opted to sell our position in Applied Materials after the shares rose over the past 18 months and they reached our estimate of their intrinsic value.

Current Positioning

The Fund continues to hold its key positions in the economically sensitive financials sector and the more defensive health care sector. Our largest sector underweight remains to technology, which rose above a 23% allocation in the MSCI World Index due to its price appreciation this past year. Our allocation is under half the benchmark weighting.

Geographically, we continue to hold overweight positions in the United Kingdom, France, and emerging markets, while maintaining underweights to the United States and Japan.

Within the benchmark, a wide dispersion of sector performance has continued, with companies in the technology and communication services sectors materially outperforming the broad index. Meanwhile, more defensive groupings—such as consumer staples, utilities, and health care—have underperformed. We have begun to notice more attractively valued companies in these sectors and have modestly increased our allocation over the past year.

We believe that the current fundamentals of our holdings bode well for the long term. As of 31 March 2024, the Fund trades at more compelling valuation levels than the benchmark, in our opinion, and our holdings in aggregate have stronger balance sheets than the companies that comprise the MSCI World and MSCI World Value indices, as highlighted by leverage metrics such as net debt to EBITDA (earnings before interest, taxes, depreciation and amortisation).

With the valuation gap between value and growth stocks widening in the past year, we are increasingly optimistic about the return potential for value stocks. Following the performance of the growth index, fuelled largely by a few U.S. tech-related companies, value stocks are trading at the largest discount relative to growth stocks (MSCI World Value vs. MSCI World Growth) since the inception of the style indices. This valuation disparity is evident across various metrics, such as price/earnings, price/cash flow and enterprise value/sales. Historically, such valuation differentials have often signalled attractive future returns for value stocks over longer term horizons.

Notably, the Fund, guided by our value philosophy and process, has tended to outperform the benchmark when value stocks have outperformed the MSCI World Index. We believe the Fund is an excellent complement and diversifier to passive and growth-oriented strategies. Going forward, we remain optimistic about the long-term prospects of our holdings.

¹Based on the actual expenses over the trailing twelve month period ended 3/31/2024. ²Out of 445 Global Large-Cap Value Equity funds as of 3/31/2024.

Class I Shares will generally be offered to institutional investors only, as determined by the fund's directors in their absolute discretion. The minimum initial subscription applicable to Class I Shares is \$1 million or its equivalent in another currency, save for Class I Shares with a GBP denominated currency for which there is a minimum initial subscription of £10,000.

Class A Shares may be offered by appointed distributors only. The minimum initial subscription applicable to A Shares is \$10,000 or its equivalent in another currency. A distribution fee of up to 1% of the net asset value of the relevant Class A Shares shall be payable out of the assets of the share class to the distributors.

Class I1 and A1 Shares are distributing share classes. Distributions are paid on an annual basis with the record date being the last business day of the calendar year.

This Fund promotes environmental and/or social characteristics and is classified as an Article 8 fund under the EU's Sustainable Finance Disclosure Regulation ("SFDR").

Additional Information for French investors: Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this UCITS presents disproportionate communication on the consideration of non-financial criteria in its investment policy.

You may not redistribute the MSCI data or use it as a basis for other indices or investment products. The MSCI World Index with net dividends captures large and mid cap representation of developed markets. The MSCI World Value Index with gross dividends captures large and mid cap securities across developed market countries exhibiting value style characteristics, defined using book value to price, 12-month forward earnings to price, and dividend yield. The MSCI World Growth Index with gross dividends captures large and mid cap securities across developed market countries exhibiting growth style characteristics, defined using long-term forward earnings per share (EPS) growth rate, short-term forward EPS growth rate, current internal growth rate, long-term historical EPS growth trend, and long-term historical sales per share growth trend.

Diversification does not assure a profit or protect against a loss in a declining market.

©2024 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or “star rating”, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Brandes Global Value Fund was rated against the following numbers of Global Large-Cap Value Equity funds over the following time periods: 445 funds in the last three years, and 392 funds in the last five years, and 254 funds in the last ten years.

This document is an advertisement for marketing purposes. Before subscribing, please read the prospectus and the key information document for packaged retail and insurance-based investment products (the “PRIIPs KID”) or, for UK investors, the key investor information document (the “UCITS KIID”). Shares in the Fund are offered only on the basis of information contained in the prospectus, PRIIPs KID, for UK investors the UCITS KIID, and the latest annual audited accounts. Copies are available free of charge from Brandes Investment Partners (Europe) Limited at Alexandra House, The Sweepstakes, Ballsbridge, Dublin, D04 C7H2, Ireland or on <https://www.brandes.com/ucits/resources>. The PRIIPs KID and UCITS KIID are available in English, Dutch, French, German and Spanish. The prospectus is available in English and German. This report is produced by the manager for marketing purposes only and does not constitute an offer or solicitation to subscribe for shares in Brandes Investment Funds plc (the “Company”). For more information on the risks associated with the Fund, please refer to the section entitled Risk Factors in the main body of the prospectus and the Fund’s supplement to the prospectus. Full details regarding the Fund are set out in the key information document for packaged retail and insurance-based investment products (the “PRIIPs KID”) or, for UK investors, the key investor information document (the “UCITS KIID”), the prospectus, the articles of association and the latest financial reports published for the Company (collectively the “Fund Documents”). Before any subscription, it is recommended that you read carefully the Fund Documents. The information provided in this material should not be considered a recommendation to purchase or sell any particular security. Income may fluctuate in accordance with market conditions and taxation arrangements. Investment in the Fund described in this report carries a substantial degree of risk and places your capital at risk. The price and value of investments can go down as well as up. Your investment may be subject to a redemption fee. You may not get back the original amount invested and you may lose all of your investment. Strategies discussed are subject to change at any time by the manager in its discretion due to market conditions or opportunities. The foregoing reflects the thoughts and opinions of Brandes Investment Partners® exclusively and is subject to change without notice.

The Fund Documents may be obtained without cost by contacting the Administrator for the Fund, your Financial Representative, or at the offices of the paying agent or representative in each jurisdiction.
