What is this product?

Type:

This product is a UCITS sub-fund of an open-ended umbrella investment company with variable capital and segregated liability between sub-funds. The Fund's assets are held through its Depository, which is State Street Fund Services (Ireland) Limited. Further information in relation to the Fund should be obtained from your financial advisor or distributor or is available at <https://www.brandes.com/ucits> in English.

Objective:

- The investment objective of the Sub-Fund is to seek long-term capital appreciation.
- The Sub-Fund is considered to be actively managed in reference to the MSCI Emerging Markets Index (the "Index"). Certain of the Sub-Fund's securities may be components of and may have similar weightings to the Index. However, the Sub-Fund may deviate significantly from the Index and the Manager may use its discretion to invest in countries or industries not included in the Index. In addition, the Sub-Fund is considered to be actively managed in reference to the MSCI Emerging Markets Value Index by virtue of the fact that it uses the MSCI Emerging Markets Value Index for performance comparison purposes. However, the MSCI Emerging Markets Value Index is not used to define the portfolio composition of the Sub-Fund or as a performance target and the Sub-Fund may be wholly invested in securities which are not constituents of the MSCI Emerging Markets Value Index.
- The Sub-Fund expects to be invested in approximately 35-85 issues. Typically, no more than 5% of the value of the Sub-Fund's total assets will be invested in any one security, at the time of purchase. With respect to the Sub-Fund's investments in any particular country or industry, the Sub-Fund may typically invest up to the greater of either (a) 20% of total assets in any particular country or industry at the time of purchase, or (b) 150% of the weighting of such country or industry as represented in the Index, at the time of purchase.
- The Sub-Fund primarily invests in equity and equity related securities of issuers located or active mainly in emerging markets.
- The investment focus will be on companies whose market capitalisations is greater than USD 3 billion at the time of purchase. At least two thirds of the investment of the Emerging Markets Value Fund (in terms of total assets) will be in equity securities of issuers located or active mainly in countries that, in the opinion of the Manager or the international community, are emerging or frontier country markets.
- The Manager's approach to selecting investments for the Sub-Fund is oriented to individual stock selection rather than on a top-down basis or macro-economic outlook. Securities are selected based on the Manager's assessment of long-term business worth compared to current value. Exposures to countries, sectors, and industries are a residual of this bottom up stock selection process.

- This Sub-Fund promotes environmental and/or social characteristics and is classified as an Article 8 fund under the EU's Sustainable Finance Disclosure Regulation ("SFDR").
- The Sub-Fund seeks to promote environmental and social characteristics through its exclusion screening process and consideration of principal adverse impacts on its investment decisions. In addition, the Sub-Fund monitors the Weighted Average Carbon Intensity ("WACI") at the portfolio level, relative to its Index. The Sub-Fund aims to maintain a WACI that is lower than the WACI of the Index on annual basis.
- The Manager can make investments for the Sub-Fund at its own discretion within the predefined investment limits.
- The Sub-Fund may invest no more than 10% of its net assets in other investment funds.
- This Sub-Fund can use derivatives, including forward foreign exchange contracts, futures, options and swaps, for investment purpose and to manage the portfolio efficiently.
- This is an accumulating share class – no dividend will be paid.
- Portfolio transaction costs are paid out of the assets of the Sub Fund the Sub-Fund.
- The Sub-Fund employs a long-term investment approach and a holding period of at least 5 years is suggested.

Dealing Frequency:

Investors can buy and sell or switch shares in the Sub-Fund on any business day. The only exceptions are days when Euronext Dublin is closed or days when the New York Stock Exchange is closed.

Term:

This Fund is an open-ended UCITS and has an indefinite duration. The Fund may be terminated at any time in line with the constitutional documents of the Company. For full investment objectives and policy details, please refer to the Investment Objectives and Investment Policy in the Fund's Supplement to the Prospectus, which are available at <https://www.brandes.com/ucits>.

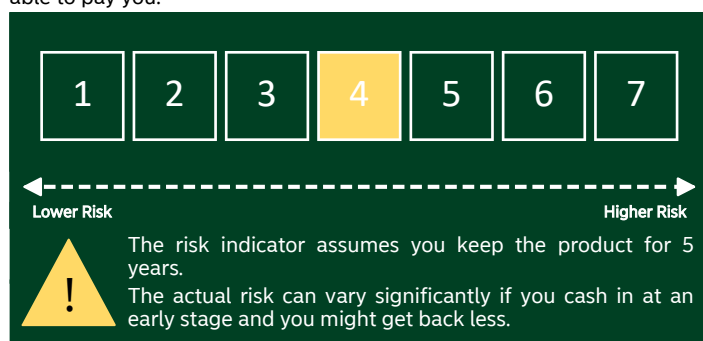

Intended investor:

The Brandes Emerging Markets Value Fund will be suitable for investors who are long term investors and who wish to add the growth potential of companies in emerging (including frontier) markets to their existing portfolio. Due to its exposure to emerging (including frontier) markets, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The NAV per share of the Fund will be published daily and made available on the internet at www.euronext.com and will be updated following each calculation of NAV.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at (www.brandes.com/UCITS).

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

What happens if Brandes Investment Funds plc is unable to pay out?

You may face a financial loss should the manufacturer default on their obligations, there is no compensation or guarantee scheme in place which may offset, all or any of, this loss. The assets of the Fund are held with its Depository, State Street Fund Services (Ireland) Limited, which is a separate company. Should the Fund default, the Depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.
